Letters of Transmittal

June 25, 2011

His Honour the Honourable Dr. Gordon L. Barnhart, S.O.M., Ph.D.
Lieutenant Governor of Saskatchewan

Your Honour:

Saskatchewan Crop Insurance Corporation continues to play a significant role in the province's agriculture industry through the programs it delivers. The Corporation works to maintain a strong relationship with producers, providing an array of business risk management programs as well as other support programs such as the 2010 Excess Moisture Program. It will continue to focus on producers' needs with quality service.

I have the honour of submitting the Saskatchewan Crop Insurance Corporation annual report and financial statements for the year ended March 31, 2011.

Respectfully submitted,

A handwritten signature in cursive script that reads "Bob Bjornerud".

Bob Bjornerud
Minister of Agriculture

June 25, 2011

The Honourable Bob Bjornerud
Minister of Agriculture

Sir:

I wish to present the 2010-2011 Saskatchewan Crop Insurance Corporation annual report for the year ended March 31, 2011.

This report outlines the actions undertaken and results achieved in the delivery of the Crop Insurance and AgriStability programs, as part of a business risk management suite that helps support Saskatchewan producers.

Respectfully submitted,

A handwritten signature in cursive script that reads "Alanna Koch".

Alanna Koch
Chair of the Board
Saskatchewan Crop Insurance Corporation

Our 2010-2011 Annual Report

The 2010-2011 Annual Report outlines the Corporation's strategic and financial activities and results for the fiscal year ending March 31, 2011.

Saskatchewan Crop Insurance Corporation followed the Public Performance Reporting Guidelines when reporting on the results of the 2010-2011 crop year. These guidelines provide an accountability framework for the Corporation's strategic plan and summarize the results achieved against those plans.

The 2010-2011 strategic plan results have been reported against the objectives and performance indicators established in 2009-2010. Complete information can be found on pages 8 through 10.

Accounting Standards

In February 2008, the Canadian Accounting Standards Board confirmed that publically accountable enterprises will be required to adopt International Financial Reporting Standards (IFRS) in place of Canadian Generally Accepted Accounting Principles (GAAP) for interim and annual reporting in fiscal years beginning on or after January 1, 2011, including comparative figures for the prior year. As both the Corporation and the Crop Reinsurance Fund of Saskatchewan qualify as an Other Government Organization as defined by the Public Sector Accounting Standards Board (PSAB), they have a choice between adopting IFRS or PSAB. After evaluating both accounting frameworks, the Corporation and the Fund have chosen to adopt PSAB effective with the year ending March 31, 2012.

Management Discussion and Analysis

This Management Discussion & Analysis (MD&A) is intended to provide a detailed look at the Corporation's structure, performance and future goals. It is intended to be read in conjunction with the remainder of the annual report. The MD&A is organized into the following sections:

Saskatchewan Crop Insurance Corporation

- Role within the Saskatchewan Ministry of Agriculture

- Governing Authorities

- Board of Directors

- Provincial Appeal Panel

- Staff

2010-2011 A Year in Review

- AgriStability

- Crop Insurance

- Excess Moisture Program

- Wildlife Damage Compensation Program

Strategic Direction

- 2010-2011 Corporate Plan and Final Results

- 2010-2011 Financial Results

- 2011-2012 Corporate Plan

Saskatchewan Crop Insurance Corporation

Role within the Saskatchewan Ministry of Agriculture

The Saskatchewan Crop Insurance Corporation (SCIC) is a provincial Crown corporation under the portfolio of the Minister of Agriculture.

The purpose of the Saskatchewan Ministry of Agriculture is to foster a commercially viable self-sufficient and sustainable agriculture and food sector. The Ministry encourages farmers, ranchers and communities to develop higher value-added production and processing and promotes sustainable economic development in rural Saskatchewan through better risk management.

The Saskatchewan Crop Insurance Corporation has developed strategic themes that correspond to the goals and direction of the Government of Saskatchewan. Where the government aims for economic growth, accountability and support of Saskatchewan families, SCIC will focus on producers, accountability and leadership.

Although SCIC is an agency of the Ministry of Agriculture, the Growing Forward federal-provincial agreement provides the structure and guiding principles for the programs SCIC delivers. Growing Forward features a business risk management suite consisting of four key components:

- AgriInvest: a savings account for producers that provides flexible coverage for small income declines and supports investments to mitigate risks or improve market income;
- AgriStability: a margin-based program that provides income support when a producer experiences larger income losses;
- AgriRecovery: a disaster relief framework that allows governments to provide rapid assistance to fill gaps not covered by existing government programs; and
- AgriInsurance (Crop Insurance): an existing production insurance program and other insurance products, which will expand to include other commodities.

On January 1, 2010, delivery of the AgriStability program was transferred from the federal government to the Province of Saskatchewan, to be administered through SCIC. The Saskatchewan Crop Insurance Corporation is well suited, as it

has established a relationship with Saskatchewan producers through the delivery of Crop Insurance (AgriInsurance).

Governing Authorities

The Saskatchewan Crop Insurance Corporation is a provincial Crown corporation established by an Act of the Legislature. As joint federal-provincial programs, Crop Insurance and AgriStability are subject to the following acts, regulations and agreements:

- *Farm Income Protection Act* (federal)
- *Crop Insurance Act* (provincial)
- Canada Production Insurance Regulations (federal)
- Crop Insurance Regulations (provincial)
- Federal/Provincial AgriInsurance Agreement
- Operational document related to the Federal/Provincial AgriInsurance Agreement
- *Income Tax Act* (federal)
- *Financial Administration Act* (federal)

The Saskatchewan Crop Insurance Corporation also administers payments under the Wildlife Damage Compensation and Livestock Predation Prevention Program – more commonly referred to as the Wildlife Damage Compensation Program – governed under the provincial *Farm Financial Stability Act* and associated regulations. In 2010, SCIC delivered the Excess Moisture Program, an AgriRecovery initiative, in accordance with this act.

The Saskatchewan Crop Insurance Corporation has complied with the provisions of these authorities.

Board of Directors

Under the Crop Insurance Act, the Board of Directors is responsible for the overall direction and development of the Crop Insurance and AgriStability programs and is authorized to conduct the affairs of SCIC. Decisions with major financial and policy implications are developed in consultation with industry and must be approved by the provincial and federal governments.

As of March 31, 2011, the Board members were Alanna Koch, chair and Deputy Minister of the Saskatchewan Ministry of Agriculture, Nithi Govindasamy, vice chair and Associate Deputy Minister, Glen Clarke and Doug Gattinger. All members are either involved in farm operations or have an agricultural background.

Provincial Appeal Panel

The Saskatchewan Crop Insurance Corporation Provincial Appeal Panel (Panel) was established to provide fair and efficient resolution to issues where a dispute between a customer and the Corporation exists. The Panel is an advisory committee of producers appointed by the Board of Directors to consider and make recommendations on individual customer concerns. A voluntary process, informal hearings are held on a regular basis with customers and staff presenting information. The Panel's recommendation is then presented to the Board of Directors for final decision.

As of March 31, 2011, members of the Panel were David Weiss (Langenburg), chair; Norman Collins (Rosetown), vice chair; Gary Kozak (Prairie River); Jack Pick (Macoun); Lee Eglund (Eastend); and Leslie Anderson (Parkside).

The Panel heard 36 appeals between April 1, 2010, and March 31, 2011. Of those appeals, five were approved in whole, 19 were denied and seven were partially allowed. Five appeals were heard but a decision was not finalized prior to March 31, 2011.

Staff

Saskatchewan Crop Insurance Corporation's head office is located in Melville with 21 customer service offices in communities throughout the province. As of March 31, 2011, SCIC employed 549 individuals, including permanent, temporary and casual positions. Of that number, 235 worked out of head office and 314 worked out of the customer service offices.

2010-2011 Year in Review

The Saskatchewan Crop Insurance Corporation (SCIC) plays a significant role in the delivery of business risk management programs on behalf of the Saskatchewan Ministry of Agriculture.

In 2010, construction of an expansion to SCIC's head office began. The expansion will accommodate the addition of new AgriStability employees. Temporary offices in three locations around Melville have been secured until the completion of construction and renovations of the existing head office space, projected to be in late 2011.

AgriStability

AgriStability is designed to provide support to producers who experience large income losses.

On January 1, 2010, the transfer of AgriStability from the federal government to SCIC was completed. The Saskatchewan Crop Insurance Corporation began plans to improve the delivery of the business risk management program for Saskatchewan farmers and ranchers. One of the key improvements identified was the need for more timely and effective processing of AgriStability applications. This improvement was selected as one of the Government of Saskatchewan's Lean projects to improve overall public service delivery to the people of Saskatchewan. The Saskatchewan Crop Insurance Corporation took a number of steps throughout the year to meet the objectives of the Lean project while at the same time handling its first full year of managing the AgriStability program.

Staffing has been a key piece of SCIC's AgriStability transition plan. Since assuming the administration, SCIC has completed its staffing requirements and provided focused training for employees so they can quickly respond to producer inquiries and ensure information is handled correctly. This will improve accuracy and reduce bottlenecks during the processing of applications.

In 2010, SCIC hired 140 additional people needed to deliver the AgriStability program. Of that amount, 110 individuals work out of the head office in Melville and 30 are situated in SCIC's 21 customer service offices.

The effective training and knowledge of the AgriStability staff has improved the rate at which program applications are processed. The national service standard is to process 75 per cent of the applications within 75 days. At the end of

March, SCIC had processed 85 per cent of the applications within the 75 day period. For SCIC, the 75 day period starts when the application is received and includes the time for some participants to submit additional information requested by staff to complete work on the application.

As of March 31, 2011, SCIC had completed processing 19,544 applications for the 2009 program year, representing 80 per cent of the total applications submitted by participants. Of the applications processed, 4,065 qualified for benefits totaling \$73.3 million.

Due to the wet conditions experienced by Saskatchewan farmers in 2010, SCIC saw increased interest from participants applying for an interim advance benefit. As of March 31, 2011, 544 interim advance applications for the 2010 program year had been received which compares to the 149 received for the 2009 program year. As of the end of March, SCIC was able to provide interim benefits of \$14.1 million to 392 of the participants who applied. Interim advances allow producers to apply for 50 per cent of their estimated final AgriStability benefit. These benefits are based on a participant's estimated margin decline, in the program year, relative to their estimated reference margin.

Throughout 2011, SCIC will continue to provide further enhancements to its program delivery in an effort to meet the needs of producers.

Crop Insurance

The Crop Insurance Program offers yield-loss insurance, whether it is due to a loss in the quality or quantity of the insured crop, and weather-based programs, providing compensation linked to data collected at weather stations.

The 2010 Crop Insurance Program was launched in February. In addition to reduced producer premiums, the Minister of Agriculture announced the addition of insurance coverage for camelina, soybeans, navy beans and honey. Flax, lentils and alfalfa seed also became eligible for the Contract Price Option. Yield cushioning was introduced as a pilot in 2009 and became a permanent feature of Crop Insurance in 2010.

Weather was a major challenge for producers in 2010. Environment Canada reported that producers across the Prairies experienced the wettest spring ever in 2010. Most areas of the province received 115 to 150 per cent of normal average precipitation. Regina's total rainfall was 517 mm, compared to the record of 503 mm in

1954 and a normal of 287 mm. Rosetown's April-to-August rainfall was double the norm. Saskatoon's April-to-September precipitation was 54 per cent wetter than the record: 645 mm compared to 420 mm recorded in 1923.

The moisture delayed seeding, crops maturing and harvesting. According to the Ministry of Agriculture's Crop Report, only 59 per cent of the crop had been seeded as of May 31, 2010, compared to a five-year average of 86 per cent. As a result, SCIC extended the dates that customers could seed crops and still be insured. The deadlines were extended to June 15 and 20, depending on crop seeded and location in the province. Still, Crop Insurance customers reported that 6.8 million acres remained unseeded, leading to the highest number of unseeded acreage claims registered and paid to date. In 2010, SCIC paid \$222.2 million on 12,049 unseeded acreage claims.

While the five-year average is 75 per cent, only 29 per cent of crops were harvested by the end of September. Customers experienced quality issues during harvest, largely due to the excess moisture, which led to higher claims than more recent years. Crop quality was estimated to be below the 10-year average.

Approximately 23,600 producers insured 21.5 million acres across the province, of which about 325,700 were forage. The Saskatchewan Crop Insurance Corporation insured 70.4 per cent of the seeded grain acres in the province. The Saskatchewan Crop Insurance Corporation was responsible for \$2.7 billion in liability, collecting \$363.1 million in premium.

In total, SCIC paid \$459.8 million on 28,106 claims in the Crop Insurance Program. The Crop Insurance and federal and provincial reinsurance funds maintain a surplus of \$480.5, a decrease from 2009 due to claims exceeding premiums in 2010.

Excess Moisture Program

Saskatchewan producers reported a total of approximately 9.7 million acres as either too wet to seed or seeded and flooded in 2010.

On July 8, 2010, the Governments of Canada, Saskatchewan, Alberta and Manitoba announced a relief program to help producers dealing with excess moisture and flooding. The Excess Moisture Program provided \$30 per eligible acre to Saskatchewan producers who had land too wet to seed as of June 20 or seeded crop lost because of flooding on or before July 31, 2010.

The program was administered by SCIC and was cost shared 60 per cent by the federal government and 40 per cent by the provincial government under the AgriRecovery framework of Growing Forward. Saskatchewan's provincial share of this program represented the largest one-time provincial agricultural disaster response in Saskatchewan's history. Financial reporting for the program is included in the financial statements of the Agricultural Stabilization Fund under the Saskatchewan Ministry of Agriculture

The Saskatchewan Crop Insurance Corporation began providing compensation to producers within six weeks of the program announcement. There were 20,997 claims registered through the Excess Moisture Program, with the program providing a total of \$252.3 million in compensation.

Wildlife Damage Compensation Program

The Wildlife Damage Compensation Program consists of three components: crop damage compensation, predation compensation and prevention. While SCIC administers this program, financial reporting for the program is included in the financial statements of the Agricultural Stabilization Fund under the Saskatchewan Ministry of Agriculture

In 2010, compensation became available for crop damage caused by any wild animal. Compensation also became available for wildlife damage to crops and feed used for swath, bale and corn grazing. The previous compensation limit of \$5,200 was also removed for wildlife damage to stacked feed in a yard site.

The Saskatchewan Crop Insurance Corporation began administering compensation for the predation of livestock on April 1, 2010. The program now provides 100 per cent compensation for the death of livestock or poultry due to predation and up to 80 per cent of the animal's value to cover veterinary costs of an injured animal.

As part of the Wildlife Damage Compensation Program, SCIC also began delivering prevention measures to reduce crop and predation losses. Available prevention measures include predation specialists, lure crops, waterfowl feeding stations, scare cannons and compensation for guard dogs and fencing.

The Wildlife Damage Compensation Program provided approximately \$17.6 million in compensation and prevention measures to producers in 2010, of which \$343,556 was spent on prevention.

Saskatchewan Crop Insurance Corporation 2010-2011 Corporate Plan and Results

Strategic Theme: Focus on the Producer		
Goal	Objectives	Indicators/Performance Measures
To assess and understand producer needs to develop responsive programs and provide timely customer service	1.1 Identify and review key policies, programs and procedures	Number of key policies reviewed Response: There were 10 policies and 16 procedures reviewed in 2010-2011.
	1.2 To ensure the delivery model meets evolving needs	Crop Insurance and AgriStability satisfaction surveys Response: There were 21 dialogue with producers sessions held across the province. Producers indicated that changes needed to be made to the distribution of the Crop Insurance Guide and how price options are communicated to producers. As a result, distribution and print were changed and downsized; and a strategy was implemented to better communicate the price options. Ninety-nine per cent of producers indicated they do not like changes being made to forms, and therefore, none have been initiated. As well, producers indicated they would like more communication through emails and text messaging and measures have been put in place to collect customer email addresses. Claim turnaround time for Crop Insurance claims and AgriStability files. Response: The average time between a post-harvest claim registered at a customer service office to the time the inspection was completed and an indemnity paid was 39.5 days. As of March 31, 2011, AgriStability completed 85 per cent of producers' applications within 75 days.
	1.3 Increase program awareness and understanding to enable producers to make informed decisions	Survey of awareness and rating of programs and services Response: No formal surveys were conducted in 2010.

Strategic Theme: Accountability																
Goal	Objectives	Indicators/Performance Measures														
To provide effective and efficient program and resource management	1.1 To develop sustainable programs 1.2 To ensure AgriStability program benefits are paid within tolerance levels	Audits are determined through a corporate risk assessment and are measured by: <ul style="list-style-type: none"> the number of compliance audits compared to long-term trends; and the number of recommendations made for policy and procedural changes as a result of audit findings. <p>Response: In the 2010 crop year, the Compliance Division performed 2,400 audits which identified \$1.1 million dollars in indemnity differences when claims were adjusted. This figure compares to the 2009 crop year when 1,920 audits were completed and the difference was \$1.2 million. The division completed 255 inspections on behalf of the Canadian Wheat Board. It conducted verification of non-insured customers for the Excess Moisture Program. There was a net difference of \$582,000 in additional funds paid to the applicants verified through this process. The total number of audits reflects all projects.</p> <p>The Compliance Division will recommend a total of five policy and procedural changes based on the audit findings for the year.</p>														
		Agricultural products affected and the magnitude of federal holdbacks due to overdue certification tests Response: There were no federal holdbacks due to overdue certification tests.														
		Value of insured production compared to the total value of all agricultural products Response: The ratio for Saskatchewan was 60.9 per cent for 2010, compared to a ratio of 55.5 per cent for Canada.														
		Value of agricultural products eligible for insurance compared to the value of all agricultural products Response: The ratio for Saskatchewan was 99.6 per cent for 2010, compared to a ratio of 85.9 per cent for Canada.														
		Long-term sustainable loss ratio (indemnity/premium) Response: The 20-year (1990-2009) loss-to-premium ratio was 82.9 per cent indicating that premiums were sufficient to cover indemnities over this time period.														
		1.3 To optimize the allocation of resources (i.e. human, financial and capital)														
	Ratios comparing administration expenses to liability, premiums, acres and contracts, as compared to long-term trends Response: <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th></th> <th>Saskatchewan</th> <th>Canada</th> </tr> </thead> <tbody> <tr> <td>Admin \$/Liab \$</td> <td>1.08%</td> <td>0.91%</td> </tr> <tr> <td>Admin \$/Prem \$</td> <td>8.07%</td> <td>9.10%</td> </tr> <tr> <td>Admin \$/Acre</td> <td>\$1.36</td> <td>\$1.69</td> </tr> <tr> <td>Admin \$/Contract</td> <td>\$1,240</td> <td>\$1,394</td> </tr> </tbody> </table>		Saskatchewan	Canada	Admin \$/Liab \$	1.08%	0.91%	Admin \$/Prem \$	8.07%	9.10%	Admin \$/Acre	\$1.36	\$1.69	Admin \$/Contract	\$1,240	\$1,394
		Saskatchewan	Canada													
	Admin \$/Liab \$	1.08%	0.91%													
	Admin \$/Prem \$	8.07%	9.10%													
Admin \$/Acre	\$1.36	\$1.69														
Admin \$/Contract	\$1,240	\$1,394														
Percentage of claims completed by declaration Response: A total of 559 claims were paid from 767 eligible for payment by declaration. Claims paid by declaration were within corporate tolerance levels for paying a claim without inspection. Claims that were outside the tolerance levels were verified in addition to a random 10 per cent that were within tolerance levels.																
Cost per AgriStability file Response: Costs are expected to be approximately \$900 per file. 2010-11 was a transition year and as a result the Corporation views this number as a preliminary indication of cost per file.																

Strategic Theme: Leadership		
Goal	Objectives	Indicators/Performance Measures
To be a leader in program development and service delivery, while being a workplace of choice	1.1 To create an environment that enables individual and organizational excellence	<p>Values audit (employee survey to establish benchmarks for employee satisfaction and organizational effectiveness)</p> <p>Response: The employee engagement survey was completed through an independent agency with 64 per cent of employees responding. The benchmarks were established relative to organizations similar to SCIC and will be used for future comparison</p> <p>Recruitment and retention statistics</p> <p>Response: AgriStability staffing is complete with some normal movement between units occurring. Staff turns as of March 31, 2011 are as follows: out-of-scope permanent 5.1 per cent, in-scope permanent 3.4 per cent, adjusters 11.3 per cent and in-scope temporary 21.4 per cent.</p>
	1.2 To be a national leader in timely service delivery and program development	<p>Acres insured in the Crop Insurance program, measured by:</p> <ul style="list-style-type: none"> The percentage of insured acres compared to seeded acres for annual crops and long-term trends; and The percentage of insured acres in the forage program, Forage Rainfall Insurance Program, Corn Heat Unit Program and New Crops Insurance Program as compared to long-term trends. <p>Response: Saskatchewan producers insured 70.4 per cent of annual crop acres seeded. This compared to 72.8 per cent in 2009, a historical average of 69.2 per cent and the 2010 national average of 83.2 per cent. The average coverage level in 2010 was 69.9 per cent of average yields. This compares to a provincial average of 68.7 per cent in 2009, the historical average (since 1990, which is the year 80 per cent coverage was first offered) of 69.7 per cent and the 2010 national average of 75.9 per cent.</p> <p>There were 325,029 acres of forage insured for yield loss or establishment, which is six per cent of the estimated tame hay acres in Saskatchewan. This compared to a five-year average of 457,623 insured acres, which is 8.6 per cent of the estimated tame hay acres in Saskatchewan.</p> <p>There were 868,665 acres of pastureland insured under the Forage Rainfall Insurance Program, which is 4.9 per cent of the estimated grazing acres in Saskatchewan.</p> <p>There were 2,060 acres insured under the Corn Heat Unit Pilot Program, which is approximately ten per cent of the 20,000 estimated fodder corn acres in Saskatchewan.</p> <p>The New Crops Insurance Program was discontinued for 2010. Reinsurance for all crops was provided under the federal-provincial agreement.</p> <p>Crop Insurance claim turnaround time relative to national levels (federal measure: claims processed within a turn-around time of 30 days, target is 80 per cent)</p> <p>Response: Eighty per cent of post-harvest claims were processed in 17 days.</p> <p>AgriStability file turnaround time relative to national levels (federal measure: 75 per cent of files completed in 75 days)</p> <p>Response: As of March 31, 2011, AgriStability completed 85 per cent of producers' applications within 75 days.</p>

2010-2011 Financial Results

The 2010-11 financial statements begin on page 17 of this report and the following provides an explanation of the variances between the budget and actual results.

	2009-2010		2010-11		
	Actual	Budget	Actual	Variances	Notes
	(thousands of \$)				
AgriInsurance					
Premiums	\$ 443,693	\$ 377,000	\$ 363,135	\$ (13,864)	1
Reinsurance premiums	(114,909)	(47,125)	(46,037)	1,088	1
Indemnities	(77,247)	(280,577)	(459,845)	(179,268)	2
Other	1,035	2,000	5,239	3,239	3
Excess (deficiency) of revenue over expenses from insurance operations	<u>\$ 252,572</u>	<u>\$ 51,298</u>	<u>\$ (137,508)</u>	<u>\$ (188,805)</u>	
AgriStability					
Contribution from Government of Saskatchewan	\$ 79,080	\$ 59,520	\$ 53,037	\$ (6,483)	4
Contribution from Government of Canada	118,621	89,280	79,556	(9,724)	4
Fees and other income	–	11,200	11,743	543	
Indemnities	(197,701)	(160,000)	(144,336)	15,664	4
	<u>\$ –</u>	<u>\$ –</u>	<u>\$ –</u>	<u>\$ –</u>	
Program delivery – administration expenses net of other administration revenue					
AgriInsurance	<u>\$ 28,572</u>	<u>\$ 29,895</u>	<u>\$ 27,864</u>	<u>\$ (2,031)</u>	5
AgriStability	<u>\$ 4,225</u>	<u>\$ 21,807</u>	<u>\$ 17,274</u>	<u>\$ (4,533)</u>	6

Notes:

- The premium and reinsurance premiums were under budget due to:
 - actual insured acres being 21.5 million compared to the forecasted 25.9 million acres as excess moisture caused a large number of acres to remain unseeded; and
 - the impact of the reduced acres was mitigated by a higher than average premium, which resulted from a shift in the crop mix to higher value crops.
- Budgeted indemnities were based on a normal claim volume with an indemnity to liability ratio of 9.3 per cent. The actual ratio was 16.97 per cent.
- The budget for 'other' included interest earnings of \$3 million offset by bad debts of \$1 million. The variance is due to interest earnings being \$0.9M more than the budget and bad debts being \$2.3M less than anticipated.
- AgriStability payments to producers were less than anticipated, which resulted in lower contributions from the provincial and federal governments.
- AgriInsurance program delivery costs were lower than the budget due to the deferral of capital costs to 2011-12 and general operating costs being less than anticipated.
- The AgriStability program delivery variance was mainly due to:
 - capital costs not being incurred by March 31, 2011 as anticipated;
 - salaries and benefits and relocation costs being less than expected;
 - Administrative Cost Share paid by producers not being in the budget; and
 - transition costs incurred by Agriculture and Agri-Food Canada that were partially offset and not in the budget.

Saskatchewan Crop Insurance Corporation 2011-2012 Corporate Plan

Summary of Plan

The Saskatchewan Crop Insurance Corporation's Corporate Plan outlines a strategy to achieve success as leaders in developing and providing responsive business risk management programs. The Saskatchewan Crop Insurance Corporation is guided by three strategic themes: Focus on the producers; Accountability; and Leadership. These three themes align with the Government of Saskatchewan's strategic themes: Economic Growth; Accountable Government; and Support Saskatchewan Families, respectively. In aligning with the Government's themes, SCIC's success will support the Ministry of Agriculture's Plan.

Vision Statement

To be leaders in developing and providing innovative and responsive business risk management programs.

Mission Statement

Work in partnership with industry and the Ministry of Agriculture to provide producers with responsive agricultural business risk management programs and services.

Values

We value innovation, open two-way communication, teamwork, accountability, integrity, fairness and respect.

Corporate Plan

Strategic Theme: Focus on the Producer		
Goal	Objectives	Indicators/Performance Measures
To assess and understand producer needs to develop responsive programs and provide timely customer service	1.1 Identify and review key policies, programs and procedures	Number of key policies reviewed
	1.2 To ensure the delivery model meets evolving needs	Crop Insurance and AgriStability satisfaction surveys Turnaround time for Crop Insurance claims AgriStability call centre statistics
	1.3 Increase program awareness and understanding to enable producers to make informed decisions	Survey of awareness and rating of programs and services

Strategic Theme: Accountability		
Goal	Objectives	Indicators/Performance Measures
To provide effective and efficient program and resource management	1.1 To develop sustainable programs	Audits are determined through a corporate risk assessment and are measured by: <ul style="list-style-type: none"> the number of compliance audits compared to long-term trends; and the number of recommendations made for policy and procedural changes as a result of audit findings. Agricultural products affected and the magnitude of federal holdbacks due to overdue certification tests Value of insured production compared to the total value of all agricultural products Long-term sustainable loss ratio (indemnity/premium)
	1.2 To ensure AgriStability program benefits are paid within tolerance levels	
	1.3 To optimize the allocation of resources (i.e. human, financial and capital)	Ratios comparing administration expenses to liability, premiums, acres and contracts, as compared to Canada average Percentage of claims completed by declaration Administrative cost per AgriStability file

Strategic Theme: Leadership

Management's Report

Responsibility for Financial Statements

The financial statements of the Saskatchewan Crop Insurance Corporation are the responsibility of management and are prepared in accordance with Canadian generally accepted accounting principles applied on the basis consistent with that of the preceding year. Management has applied its best judgment where estimates are required using all information available to June 20, 2011. Other financial information in the annual report is consistent with that provided in these financial statements.

The Saskatchewan Crop Insurance Corporation's accounting system and systems of internal control are maintained to provide reasonable assurance that transactions are properly authorized and recorded, that assets are properly safeguarded and that the financial information is relevant and reliable.

The Saskatchewan Crop Insurance Corporation's external auditor, KPMG LLP, has audited these financial statements and conducted a review of internal accounting policies and procedures to the extent required to enable them to express an

opinion on these financial statements.

The Board of Directors of the Saskatchewan Crop Insurance Corporation is responsible for overseeing management's performance of its financial responsibilities and has reviewed and approved these financial statements.

Auditors' Report

To the Members of the Legislative Assembly of the Province of Saskatchewan

We have audited the accompanying financial statements of Saskatchewan Crop Insurance Corporation, which comprise the statement of financial position as at March 31, 2011, and the statements of operations and net assets and cash flows for the year then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian accounting standards for principles, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement

of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Saskatchewan Crop Insurance Corporation as at March 31, 2011, and the results of its operations and cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Saskatchewan Crop Insurance Corporation

Notes to Financial Statements

March 31, 2011

1. Status of the Corporation:

The Saskatchewan Crop Insurance Corporation (the "Corporation"), a provincial Crown corporation, was established under *The Crown Corporations Act* and continued under *The Crop Insurance Act*.

The Corporation administers the federal/provincial AgriInsurance and AgriStability Programs. In addition, on behalf of the Ministry of Agriculture and the Saskatchewan Agricultural Stabilization Fund, the Corporation administers the Wildlife Damage Compensation, New Crops Insurance, and Canada Saskatchewan Assistance accounts. The financial results of the Saskatchewan Agricultural Stabilization Fund are reported separately.

Growing Forward: A Federal-Provincial-Territorial Framework Agreement on Agriculture, Agri-Food and Agri-Based Products Policy, which replaced the *Canada-Saskatchewan Agriculture Policy Framework Implementation Agreement*, requires that reinsurance funds be established by the Government of Canada and the Government of Saskatchewan. These reinsurance funds receive reinsurance premiums from the Corporation and, under certain circumstances, pay reinsurance benefits to the Corporation.

AgriInsurance rates and reinsurance premiums are set such that the AgriInsurance Program is actuarially sound over the long term. Any indemnities receivable, in excess of assets within the Crop Reinsurance Fund of Saskatchewan, will be recovered through future reinsurance premiums paid by the Corporation. If these future reinsurance premiums are insufficient to pay reinsurance benefits and repay this receivable, the Province of Saskatchewan General Revenue Fund is required to fund any deficiency.

The Crop Reinsurance Fund of Saskatchewan is administered by the Corporation. The operations, assets and liabilities of this reinsurance fund are reported in separate financial statements as required by the *Growing Forward: A Federal-Provincial-Territorial Framework Agreement on Agriculture, Agri-Food and Agri-Based Products Policy*.

AgriStability was established under the *Growing Forward: A Federal-Provincial-Territorial Framework Agreement on Agriculture, Agri-Food and Agri-Based Products Policy* as a continuation of the Canadian Agricultural Income Stabilization (CAIS)

program. The Corporation began administering this program for Saskatchewan as of January 1, 2010. This program provides agricultural producers with protection against declines in Production Margin (as defined in the AgriStability Program Guidelines). Participants must enrol in the program and pay administration and enrolment fees based on a reference margin based on the individual participant's Production Margin for specified prior years. A program benefit is paid to the participant when the participant's current Production Margin falls below the set reference margin. AgriStability provides coverage for Production Margin declines greater than 15 percent. The Federal and Saskatchewan governments share the AgriStability program costs on the basis of 60 per cent and 40 per cent respectively.

As a crown entity, the Corporation is not subject to federal or provincial income tax, or federal goods and services tax.

2. Significant Accounting Policies:

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles (GAAP).

In February 2008, the Canadian Accounting Standards Board confirmed that publicly accountable enterprises will be required to adopt International Financial Reporting Standards (IFRS) in place of Canadian GAAP for interim and annual reporting in fiscal years beginning on or after January 1, 2011, including comparative figures for the prior year. As the Corporation qualifies as an Other Government Organization as defined by the Public Sector Accounting Standards Board (PSAB) it has a choice between adopting IFRS or PSAB. The Corporation will be adopting PSAB Accounting Standards for the fiscal year ending March 31, 2012, and is currently evaluating the potential impact on its financial operations.

Financial assets and liabilities:

The measurement basis for financial assets and financial liabilities depends on whether the financial assets and liabilities have been classified as held for trading, available for sale, held to maturity, loans and receivables, or other financial liabilities. Financial assets and liabilities classified as held for trading are measured at fair value and changes in fair value are recognized in net income. Financial assets classified as

available for sale are measured at fair value with unrealized changes in fair value recorded in other comprehensive income; however, unrealized losses considered other than temporary continue to be recognized as a decrease to net income. Financial assets designated as held to maturity, loans and receivables, or other financial liabilities are measured at amortized cost using the effective interest method. The Corporation has no financial assets designated as held to maturity.

The Corporation has designated its cash, investments and due from the Province of Saskatchewan General Revenue Fund as available for sale. Accrued interest and other receivables, due from producers, due from the Province of Saskatchewan and due from the Government of Canada are designated as loans and receivables. Accounts payable and accrued liabilities, deferred indemnities payable and indemnities payable are designated as other financial liabilities.

Property, plant and equipment:

Property, plant and equipment are capitalized and amortized over their useful lives. They are recorded on the statement of financial position at their net book value.

Amortization is charged against operations, and is provided on a straight line basis over the estimated useful lives of the assets as follows:

Equipment	5 years
Leasehold improvements	5 years
Computer equipment	5 years

Intangible assets:

Intangible assets are capitalized and amortized over their useful lives. They are recorded on the statement of financial position at their net book value.

Amortization is charged against operations, and is provided on a straight line basis over the estimated useful lives of the assets as follows:

Software	5 years
----------	---------

Cash and cash equivalents:

Cash and cash equivalents consist of cash, short term investments with a maturity of 90 days or less and the Corporation's bank account which is included in the Consolidated Offset Bank

Concentration arrangement for the Government of the Province of Saskatchewan (note 3).

Investments:

Investments are carried at fair value. The fair value of investments is based on cost, which approximates fair value due to the immediate or short-term nature of these financial instruments.

Investment earnings:

The Corporation recognizes interest as earned and investment gains and losses when realized.

Realized gains and losses represent the difference between the amounts received through the sale of investments and their respective cost base. Interest is generally receivable on a semi-annual basis.

Indemnities payable:

Indemnities payable represents estimates of the total cost of outstanding claims at the year-end date. Measurement of the indemnities payable is uncertain as all of the necessary information for reported claims is not always available as of the year-end and therefore estimates are made as to the value of these claims. As a result, indemnities payable are selected from a range of possible outcomes and actual results may differ materially from the estimate.

Premium revenue recognition:

Crop insurance is a cost-shared program. Premium payments are cost-shared for 2011 and 2010 as follows:

	Producers %	Federal Gov't %	Provincial Gov't %
Comprehensive coverage	40	36	24
Weather derivatives	40	36	24
Weather derivatives top-up	66.7	20	13.3

Premiums, including the producer and federal and provincial governments' contributions, are recognized as revenue when invoiced to producers.

Use of estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial

statements, and the reported amounts of revenue and expenses during the year. Significant items subject to such estimates and assumptions include the valuation of the allowance for doubtful premiums receivable and of indemnities payable. Actual results could differ materially from those estimates.

3. Due from the Province of Saskatchewan General Revenue Fund:

The Corporation's bank account is included in the Consolidated Offset Bank Concentration arrangement for the Government of the Province of Saskatchewan. Interest is earned on these funds at the government's thirty day borrowing rate, and is based on the Corporation's average daily account balance. Interest is paid by the Province of Saskatchewan General Revenue Fund to the Corporation on a quarterly basis. During the current year, the average rate was 0.80 per cent (2010 – 0.27 per cent).

4. Investments:

The Corporation's investments are in bankers' acceptances and corporate promissory notes maturing within 82 days of March 31, 2011, with an average effective interest rate of 1.09 per cent (2010 – within 98 days of March 31, 2010 and 0.29 per cent, respectively).

5. Determination of Fair Value:

Fair value is best evidenced by an independent quoted market price for the same instrument in an active market. An active market is one where quoted prices are readily available, representing regularly occurring transactions. The determination of fair value requires judgment and is based on market information where available and appropriate. Fair value measurements are categorized into levels within a fair value hierarchy based on the nature of the inputs used in the valuation.

Level 1 – Where quoted prices are readily available from an active market.

Level 2 – Valuation model not using quoted prices, but still using predominantly observable market inputs such as market interest rates.

Level 3 – Models using inputs that are not based on observable market data.

	2011 (thousands of \$)			Total
	Level 1	Level 2	Level 3	
Investments	\$ 330,095	\$ –	\$ –	\$ 330,095

	2010 (thousands of \$)			Total
	Level 1	Level 2	Level 3	
Investments	\$ 411,326	\$ –	\$ –	\$ 411,326

During the year, no investments were transferred between levels. The fair value of all other financial assets and liabilities approximates their carrying value due to their short-term nature.

6. Property, Plant and Equipment:

	Cost	Accumulated Amortization	2011	2010
			Net Book Value	Net Book Value
(thousands of \$)				
Equipment	\$ 3,666	\$ 3,057	\$ 609	\$ 579
Leasehold improvements	5,110	1,836	3,274	904
Computer equipment	14,834	11,972	2,862	1,985
	<u>\$ 23,610</u>	<u>\$ 16,865</u>	<u>\$ 6,745</u>	<u>\$ 3,468</u>

7. Intangible Assets:

	Cost	Accumulated Amortization	2011	2010
			Net Book Value	Net Book Value
(thousands of \$)				
Software	\$ 12,106	\$ 5,662	\$ 6,444	\$ 4,873

8. Indemnities Payable:

	2011	2010
	(thousands of \$)	
AgriStability	\$ 257,724	\$ 196,951
AgriInsurance	6,513	1,753
	<u>\$ 264,237</u>	<u>\$ 198,704</u>

The majority of AgriStability benefit applications had not been received at March 31, 2011.

Due to weather conditions, some prior year AgriInsurance claims could not be finalized by March 31, 2011.

The estimate of the provision for indemnities payable is based on a number of subjective factors and results in risk that the actual results may differ materially from the estimate.

9. Financial Risk Management:

The nature of the Corporation's operations results in a statement of financial position that consists primarily of financial instruments. The risks that arise are credit risk, market risk (consisting of interest rate risk, foreign exchange risk and equity price risk) and liquidity risk.

Significant financial risks are related to the Corporation's investments. These financial risks are managed by investing in short-term investments which reduce the risk of market fluctuations.

Credit risk:

The Corporation's credit risk arises primarily from two distinct sources: accounts receivable (from its customers and reinsurers) and certain investments. The maximum credit risk to which it is exposed at March 31, 2011 is limited to the carrying value of the financial assets summarized as follows:

	2011	2010
	(thousands of \$)	
Cash	\$ 141	\$ 225
Investments	330,095	411,326
Accrued interest and other receivables	1,232	696
Due from producers	8,147	14,668
Due from the Province of Saskatchewan	106,176	93,846
Due from the Government of Canada	161,068	130,923
Total	<u>\$ 606,859</u>	<u>\$ 651,684</u>

The makeup of due from producers is as follows:

	2011	2010
	(thousands of \$)	
Less than one year	\$ 8,145	\$ 16,004
Greater than one year	6,791	7,282
Subtotal	14,936	23,286
Allowance for doubtful accounts	(6,789)	(8,618)
Total	<u>\$ 8,147</u>	<u>\$ 14,668</u>

Provisions for credit losses are maintained in an allowance account and regularly reviewed by the Corporation. Amounts are written off once

reasonable collection efforts have been exhausted. Details of the allowance account are as follows:

	2011	2010
	(thousands of \$)	
Allowance for doubtful accounts, opening balance	\$ 8,618	\$ 7,868
Accounts written off	(476)	(256)
Current period provision	(1,353)	1,006
Allowance for doubtful accounts, ending balance	<u>\$ 6,789</u>	<u>\$ 8,618</u>

Market risk:

Market risk represents the potential for loss from changes in the value of financial instruments. Value can be affected by changes in interest rates, foreign exchange rates and equity prices. Market risk primarily impacts the value of investments.

Interest rate risk is managed by investing primarily in short term investments. The Corporation is not subject to risks related to foreign exchange or equity prices.

Liquidity risk:

Liquidity risk is the risk that the Corporation is unable to meet its financial obligations as they fall due. Cash resources are managed on a daily basis based on anticipated cash flows. The majority of financial liabilities, excluding certain unpaid claims liabilities, are short-term in nature, due within one year. The Corporation generally maintains positive overall cash flows through cash generated from operations, as well as cash generated from its investing activities.

10. Capital Management:

The Corporation's primary objectives when managing capital is to ensure adequate funding is available to pay claims and deliver AgrilInsurance and Agristability programs which are sustainable on a long-term basis. Its main source of capital is its net assets.

There were no changes to the Corporation's capital structure during the period and there have been no changes to the Corporation's capital management processes and measures since the prior year end.

11. Deferred Administration Revenue:

Under the terms of federal-provincial agreements governing the AgriStability and AgriInsurance programs, eligible administration revenue and expenses are shared 60 per cent by the Government of Canada and 40 per cent by the Government of the Province of Saskatchewan.

Government of Canada contributions are paid to the Province of Saskatchewan General Revenue Fund, which remits them to the Corporation.

To the extent this funding was not required to pay administration fund expenses of the current year it has been deferred and shown as deferred administration revenue and will be used to fund future administration expenses.

Details of administration funding received and recorded as revenue follows:

	2011	2010
	(thousands of \$)	
Deferred administration revenue, beginning of year	\$ 25,889	\$ 10,387
General Revenue Fund net operating grant received	46,223	48,299
Net operating grant recorded as revenue	(45,138)	(32,797)
Deferred administration revenue, end of year	<u>\$ 26,974</u>	<u>\$ 25,889</u>

12. Pension plans:

The Corporation's employees participate in the Public Service Superannuation Plan, a multi-employer defined benefit pension plan, or the Public Employees Pension Plan, a multi-employer defined contribution pension plan. Pension costs of \$1,499,722 (2010 - \$1,088,000) are included in salaries and benefits and comprise the cost of employer contributions for current service of employees during the year.

The Corporation's liability is limited to the required contributions.

13. Related party transactions:

Included in these financial statements are transactions with various Saskatchewan crown corporations, ministries and agencies related to the Corporation by virtue of common control exercised by the Government of the Province of Saskatchewan.

Routine operating transactions with related parties are measured at agreed upon exchange rates under normal trade terms. These financial statements include the following balances from and transactions with related parties:

	2011	2010
	(thousands of \$)	
Accounts payable	\$ 2,108	\$ 755
Administration expenses	\$ 12,564	\$ 7,654

Other related party transactions are disclosed elsewhere in these financial statements.

14. Commitments and Contingencies:

Commitments:

The Corporation is committed to the Ministry of Government Services, a related crown entity, for several leases for office space with annual payments of \$1,842,182. The leases are currently renewable on an annual basis.

The Corporation is also committed to other corporations for the purchase of weather data and the lease of equipment for weather stations around Saskatchewan. Minimum payments are \$459,935 for 2011-2012. In addition, the Corporation is committed to other corporations for the provision of information technology and support services. Payments for 2011-2012 are estimated at \$5,006,942.

Contingencies:

Pursuant to the *Growing Forward: A Federal-Provincial-Territorial Framework Agreement on Agriculture, Agri-Food and Agri-Based Products Policy*, in the event the agreement is terminated and no new agreement is entered into, all property, plant and equipment funded by the agreement shall be disposed of and the proceeds shall be shared by the Government of the Province of Saskatchewan and the Government of Canada. As of March 31, 2011, all property, plant and equipment owned by the Corporation had been funded by this agreement.

Various legal actions for additional crop insurance indemnity payments have been initiated against the Corporation. Presently, the Corporation is actively defending these cases. While the outcome of these claims cannot be determined, management is of the opinion that the result of these actions will not have a material impact on the Corporation's financial position.

Crop Reinsurance Fund of Saskatchewan Auditors Report

To the Members of the Legislative Assembly of the Province of Saskatchewan

We have audited the accompanying financial statements of Crop Reinsurance Fund of Saskatchewan, which comprise the statement of financial position as at March 31, 2011, and the statement of operations and fund balance for the year then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian accounting principles, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement

of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Crop Reinsurance Fund of Saskatchewan as at March 31, 2011, and the results of its operations and cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Notes to Financial Statements of the Crop Reinsurance Fund of Saskatchewan

March 31, 2011

1. Status of the Fund:

Growing Forward: A Federal-Provincial-Territorial Framework Agreement on Agriculture, Agri-Food and Agri-Based Products Policy replaced the *Canada-Saskatchewan Agriculture Policy Framework Implementation Agreement* and provides for the establishment of two reinsurance funds:

- a) The Crop Reinsurance Fund of Saskatchewan (the Fund) which is administered by the Government of the Province of Saskatchewan, and
- b) The Crop Reinsurance Fund of Canada for Saskatchewan which is administered by the Government of Canada.

2. Significant Accounting Policies:

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles (GAAP).

In February 2008, the Canadian Accounting Standards Board confirmed that publicly accountable enterprises will be required to adopt International Financial Reporting Standards (IFRS) in place of Canadian GAAP for interim and annual reporting in fiscal years beginning on or after January 1, 2011, including comparative figures for the prior year. As the Fund qualifies as an Other Government Organization as defined by the Public Sector Accounting Standards Board (PSAB) it has a choice between adopting IFRS or PSAB. The Fund will be adopting PSAB Accounting Standards for the fiscal year ending March 31, 2012, and is currently evaluating the potential impact on its financial operations.

Financial assets and liabilities:

The measurement basis for financial assets and liabilities depends on whether the financial assets or liabilities has been classified as held for trading, available for sale, held to maturity, loans and receivables, or other financial liabilities. Financial assets classified as held for trading are measured at fair value and changes in fair value are recognized in increase in net assets for the year. Financial assets or liabilities classified as available for sale are measured at fair value with changes in fair value recorded in other comprehensive income, however, unrealized losses considered other than temporary continue to be recognized as a decrease in net assets for the year. Financial assets or liabilities designated as held to maturity,

loans and receivables, or other financial liabilities are measured at amortized cost using the effective interest method. The Fund has no financial assets or liabilities designated as held for trading or held to maturity.

The Fund has designated its due from the Province of Saskatchewan's General Revenue Fund as available for sale. Reinsurance premium receivable from the Saskatchewan Crop Insurance Corporation has been designated as loans and receivables.

Reinsurance premium ceded from the Saskatchewan Crop Insurance Corporation:

Under the terms of the agreement referred to in note 1, the Saskatchewan Crop Insurance Corporation is required to pay reinsurance premiums to the reinsurance funds based on premiums received during the insurance year.

Liability for claim payments from the reinsurance funds:

Under the terms of the agreement referred to in note 1, payments are required from the reinsurance funds if indemnities which were required to be paid in an insurance year exceeded the aggregate of:

- a) the premium receipts for the year less reinsurance premiums ceded, and
- b) the net assets of the Saskatchewan Crop Insurance Corporation's Crop Insurance Fund.

To the extent that payments are required out of the reinsurance funds, the Crop Reinsurance Fund of Saskatchewan is responsible for an amount not exceeding 2.50 per cent (2010 - 2.50 per cent) of the total liability under policies in force in the insurance year. However, the Crop Reinsurance Fund of Saskatchewan is not required to pay any amounts if it has made a payment in previous years and the payment that has not yet been recovered from its operations exceeds 16.67 per cent of the total liability of the policies in force for the current year.

The balance of indemnities that exceed the net assets in the Saskatchewan Crop Insurance Corporation are shared 75 per cent by the Reinsurance Fund of Canada for Saskatchewan and 25 per cent by the Reinsurance Fund of Saskatchewan.

Crop insurance rates and reinsurance premiums are set such that the Crop Insurance Program

is actuarially sound over the long term. Any indemnities payable to the Saskatchewan Crop Insurance Corporation, in excess of assets within the Crop Reinsurance Fund of Saskatchewan, will be recovered through future reinsurance premiums paid by the Saskatchewan Crop Insurance Corporation. If these future reinsurance premiums are insufficient to allow the Crop Reinsurance Fund of Saskatchewan to repay this payable, the Government of Saskatchewan is required to fund any deficiency.

Indemnities payable to Saskatchewan Crop Insurance Corporation:

This includes estimates of the total cost of outstanding claims at the year-end date. Measurement of the indemnities payable is uncertain as all of the necessary information for reported claims is not always available as of the year-end and therefore estimates are made as to the value of these claims.

As a result, indemnities payable are selected from a range of possible outcomes and actual results may differ materially from the estimate.

Use of estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions which affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the period. Actual results could differ materially from those estimated.

3. Due from the Province of Saskatchewan General Revenue Fund:

The Crop Reinsurance Fund bank account is included in the Consolidated Offset Bank Concentration arrangement for the Government of the Province of Saskatchewan.

Interest earned on these funds is not allocated to the Crop Reinsurance Fund.

4. Statement of Cash Flows:

A statement of cash flows has not been prepared as a separate statement would not provide additional, useful information.

5. Fair Value of Financial Assets:

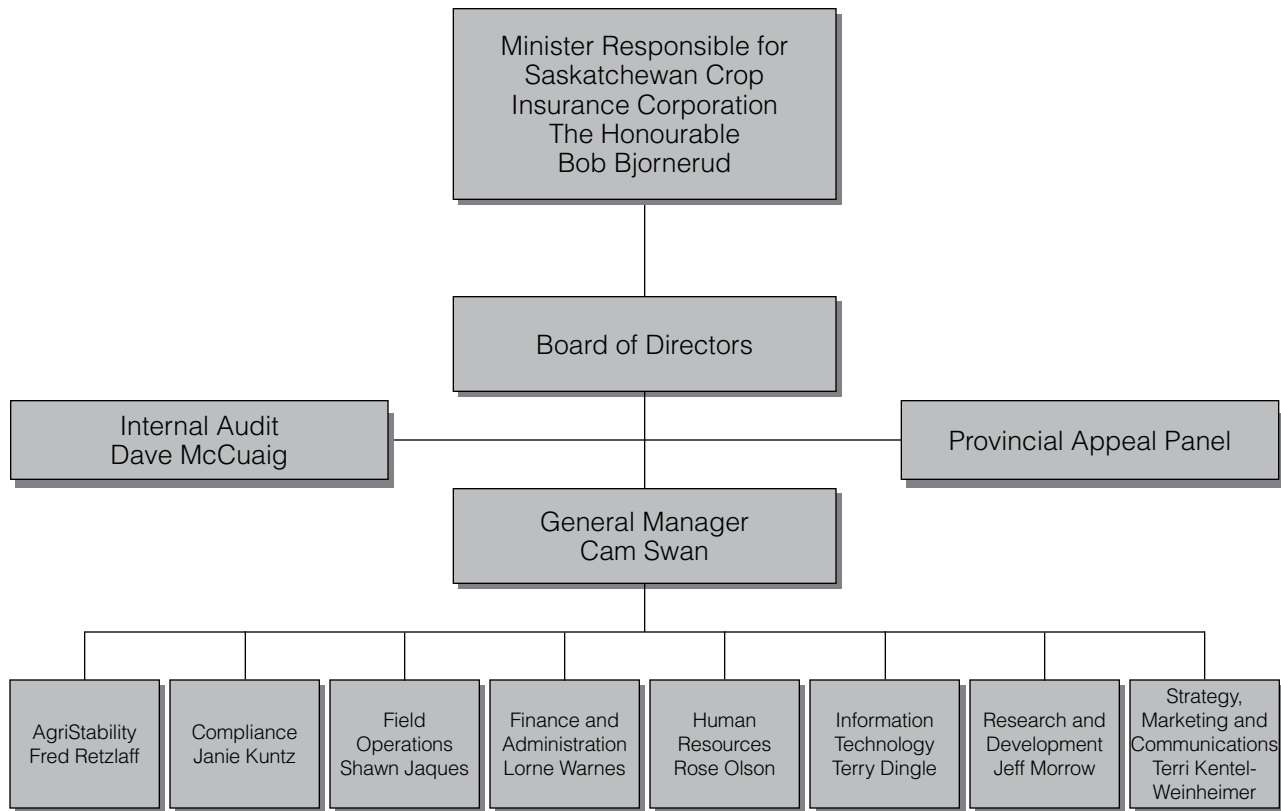

The fair value of the due from the Province of Saskatchewan General Revenue Fund and the reinsurance premium receivable from Saskatchewan Crop Insurance Corporation approximate their carrying values due to their short-term nature.

6. Capital Management:

The Fund's primary objectives when managing capital is to ensure adequate funding is available to pay reinsurance claims and deliver a crop reinsurance program which is sustainable on a long-term basis.

There were no changes to the Fund's capital structure during the period and there have been no changes to the Fund's capital management processes and measures since the prior year end.

* Change in Ratio of Insured to Seeded Acres in prior years is due to decrease of seeded acres as determined by Census data and Statistics Canada Analysis.

** Not all registered claims result in an inspection and/or payable loss.

Crop Insurance Overview

Crop Insurance assists producers in managing their operation's production risk against natural hazards over the crop year. The multi-peril Crop Insurance Program guarantees customers a minimum crop yield and quality, while additional program options allow producers to tailor coverage to their operation. The following is a summary of the Crop Insurance program that was available to producers from April 1, 2010, to March 31, 2011

Establishment Benefit

The Establishment Benefit is a component of the core multi-peril contract of insurance. It covers crops that fail to adequately establish or suffer significant damage due to insurable causes before June 20.

Establishment Benefit		
Crop Year	# of Claims Paid	Indemnity Paid
2001	1,503	\$ 4,111,480
2002	3,233	\$ 11,299,085
2003	3,408	\$ 9,792,735
2004	4,540	\$ 8,498,000
2005	2,181	\$ 3,167,670
2006	1,976	\$ 3,833,040
2007	1,303	\$ 3,148,210
2008	1,191	\$ 3,733,765
2009	1,339	\$ 9,742,940
2010	4,628	\$ 14,067,155

* This is for the grains program only.

Gopher Damage Feature

During the establishment period, customers have two options for acres damaged by gophers: an Establishment Benefit or the Gopher Damage Feature. This feature provides \$50 per acre for crop acres destroyed by gophers until June 20.

Gopher Damage Feature		
Crop Year	# of Claims Paid	Indemnity Paid
2007	425	\$ 1,005,350
2008	358	\$ 687,600
2009	126	\$ 209,450
2010	114	\$ 159,350

Unseeded Acreage

The Unseeded Acreage feature compensates producers for acres that are too wet to seed by June 20. The calculation to determine eligible acres includes seeding and insurance intensities and a deductible. The seeding intensity is a four-year average comparing seeded acres to cultivated acres to determine normally-seeded acres. The insurance intensity is the percentage of acres insured compared to acres that could have been insured. A five per cent deductible of the normally-seeded acres is also applied.

Unseeded Acreage		
Crop Year	# of Claims Paid	Indemnity Paid
2001	185	\$ 609,700
2002	61	\$ 281,400
2003	95	\$ 436,500
2004	2,967	\$ 31,579,950
2005	2,327	\$ 15,242,850
2006	5,920	\$ 62,581,750
2007	6,241	\$ 33,677,350
2008	39	\$ 33,600
2009	230	\$ 458,713
2010	12,049	\$ 222,155,750

Irrigation Coverage

Coverage is higher and premium rates are lower for irrigated crops than for dryland crops, reflecting the higher average yields and reduced risk.

The Enhanced Irrigation Pilot Program was introduced in 2008 to provide a separate guarantee for irrigated and dryland acres of the same crop; indemnities on one land use will not affect production of the same crop on the other land use.

Irrigation Option Historical Participation			
Year	Insured Acres	Year	Insured Acres
2001	49,453	2006	36,583
2002	36,796	2007	35,355
2003	37,793	2008	37,606
2004	40,734	2009	37,653
2005	47,492	2010	39,839

Diversification Option

The Diversification Option is available for crops and varieties not insurable under the core multi-peril insurance program. A producer must have acres enrolled in the regular grains program as coverage, premium and claims are averaged.

Diversification Option Historical Participation			
<u>Year</u>	<u>Insured Acres</u>	<u>Year</u>	<u>Insured Acres</u>
2001	2,099	2006	13,200
2002	3,316	2007	9,612
2003	7,473	2008	9,263
2004	8,906	2009	12,106
2005	8,500	2010	4,862

Pedigreed Seed Option

The Pedigreed Seed Option provides a higher price option for insurable crops and a quality adjustment if the germination for the seed produced is below certified seed standards.

Pedigreed Crop Option Historical Participation			
<u>Year</u>	<u>Insured Acres</u>	<u>Year</u>	<u>Insured Acres</u>
2001	128,608	2006	131,147
2002	172,600	2007	118,485
2003	170,216	2008	137,286
2004	157,720	2009	154,615
2005	155,988	2010	124,635

Crop Averaging Program

The Crop Averaging Program groups insured crops and provides coverage up to 90 per cent, for the same premium as 80 per cent. Claims are paid based on the total value of crops harvested compared to the dollar coverage on all crops.

Vegetable Insurance Pilot Program

Vegetable insurance is an acreage loss insurance program; individual production is not measured.

Wild Rice Insurance Program

This program is an area-based insurance program; coverage is based on the region in which a producer harvests. Claims are triggered when a region's reported annual production is less than the average historical production.

Organic Option

Organic coverage for production losses is available for certified organic producers. Organic prices are set higher than commercial crops based on markets; yields are reduced and premium rates are higher to reflect increased risk.

Organic Crop Option Historical Participation			
<u>Year</u>	<u>Insured Acres</u>	<u>Year</u>	<u>Insured Acres</u>
2001	79,297	2006	179,641
2002	110,476	2007	185,941
2003	172,032	2008	219,522
2004	167,247	2009	220,249
2005	204,679	2010	142,662

Honey Production Insurance Program

The Honey Production Insurance Program insured honey for yield loss for commercial beekeepers in the province. Beekeepers were offered individual coverage based on 10 years of verifiable production information and could select coverage at 50, 60 or 70 per cent of their average yield.

Forage Insurance Program (Multi-Peril) Historical Statistics

Year	Number of Contracts	Number of Endorsements	Number of Endorsements Receiving Indemnity	Acres Insured	Liability	Total Premium	Indemnity	Loss Ratio

* 2005 - 2010 includes Forage Diversification.

** Forage indemnities have been restated to include subsequent indemnities for forage establishment claims paid in the current year.

Forage Insurance Program

This program provides production loss insurance on tame hay, greenfeed, dehydrated alfalfa and sweetclover. The Saskatchewan Crop Insurance Corporation also offers a Timothy Hay Pilot Program to producers in the Outlook area, providing coverage on irrigated acres intended for export.

Weather-Derivative Programs

The Saskatchewan Crop Insurance Corporation has two weather-derivative programs where claims are not based on individual production but on data gathered at selected weather stations. The Forage Rainfall Insurance Program (FRIP) protects grazing acres against below-average seasonal precipitation. The Corn Heat Unit (CHU) Program insures feed and grain corn producers against a lack of required heat units over the growing season.

Forage Rainfall Insurance Program

Year	Contracts	Endorsements	Acres	Liability	Claims	Premium	Indemnity	Loss Ratio
2001	336	558	209,747	\$ 7,628,510	283	\$ 827,733	\$ 625,577	0.76

* In 1992 only, the provincial government paid 41¼ per cent producers, 33¼ per cent, and the federal government 25 per cent of the incremental premium between 70 and 80 per cent coverage.

◇ For 2000 only, the federal government paid 60 per cent of government premiums.

§ Projected Overall cost sharing. Also applied to Forage Rainfall Insurance Program (FRIP) and Annual Crop Weather Based Insurance Program (ACWBP).

△ The cost sharing for high cost coverage is established under the Growing Forward Agreement. It applies to the Enhanced Top-Up Option under the Annual Crop Weather Based Insurance Program as the coverage is considered to be above the level provided under the comprehensive cost-sharing provisions of the APF.

Appendix 3: Wildlife Damage Compensation Program

Saskatchewan Crop Insurance Corporation administers the Wildlife Damage Compensation Program under the Growing Forward agreement on behalf of the federal and provincial governments. Financial reporting for the program is included in the financial statements of the Agricultural Stabilization Fund under the Saskatchewan Ministry of Agriculture.

Funding for crop and predation losses is cost shared 60 per cent by the federal government and 40 per cent by the provincial government for 80 per cent of the compensation. The remaining 20 per cent has been provided through an increased investment from the Government of Saskatchewan.

Big Game

From 1984 to 1990, the Big Game Compensation Program was administered by Saskatchewan Environment followed by the Saskatchewan Crop Insurance Corporation, starting in 1991. No program was offered in 1994 and 1995. The Big Game program resumed in November of 1996, but claims were not paid until 1997. Therefore, 97-98 included claims from both 1996 and 1997 crop years.

Prior to 1996, the Big Game program was a provincial responsibility while the waterfowl program was a joint responsibility, with the indemnities shared between governments on a 50/50 basis. Payments under both programs were funded pay-as-you-go. Beginning in 1996, both programs were made eligible for federal and provincial funding.

*100 per cent compensation began in 09-10.
