

AgriStability Corporations/Co-ops/ Other Entities Instruction Guide

How to Complete Your Corporations/Co-ops/ Other Entities Form

1 Your SCIC ID and AgriStability PIN are different numbers.

The AgriStability PIN is generated by the Federal Government for AgriStability and AgriInvest purposes, whereas the SCIC ID is unique to your Saskatchewan Crop Insurance account.

Note: Crop Insurance contract numbers are not to be used as either the SCIC ID or AgriStability PIN.

- 2 Please ensure all email addresses for the participant and contact persons are current and spelled correctly.
- 3 Complete this area if someone else (e.g., spouse, common-law partner or accountant) has your consent to provide or ask for more information about your AgriStability and AgriInvest forms on your behalf. SCIC will communicate with your contact person as the first point of contact. Written correspondence will be sent to you and your contact person.

Note: A contact person will not be able to cancel your participation in the AgriStability Program, and they will remain on file until you authorize the change.

- If you require additions or deletions of any contact persons receiving a copy of your Calculations of Benefits, please contact our toll free line at 1-866-270-8450.
- 5 For AgriStability purposes, the Main Farmstead is where the majority of the gross farming income was derived, not your home quarter.

- 6 For deceased participants, please attach a copy of the Death Certificate and the Last Will and Testament or a letter indicating the court-appointed administrator.
- The income, expense and inventory information of two or more operations may be combined if the operations are not legally, financially or operationally independent; or if all or some of the transactions between the operations are above or below fair market value.
- 8 SCIC will review your request to add or remove operations from your whole farm. Additional information may be required.
- 9 Section 85 Rollover is when a farming operation has transitioned from a sole proprietor or partnership to a corporation. SCIC requires a copy of the Section 85 Rollover, as provided to the Canada Revenue Agency, and an Election of Disposition of Property documents. A Change Business Type form must also be completed and submitted.
- Paper copies of the application must be signed by the participant or signing officer, not the form preparer. If the application is submitted through AgConnect, it is deemed password-protected and will be accepted as a signature.

- If you are involved in multiple farming operations, you must submit program forms for each operation and assign a different operation number for each one (e.g., 1, 2, 3, etc.). This operation number is used on your AgriStability applications to clearly identify each operation. It is important to use the same operation number for the corresponding farm each year.
- A "crop share" is an agreement between a land owner ("landlord") and land operator ("tenant") in which the crop is shared, rather than a cash rent agreement; however, cropping expenses may not be shared. The tenant should report any areas being crop shared. Producers are to report only their share of acres and production associated with their percentage of the crop share. They must also report income and expenses associated with only their share. For example, if they have 1/3 of the crop share, they only report 1/3 of the income, expenses, acres and production associated with their share.
- Cash method of accounting is when you report income in the fiscal period in which your receive it and deduct expenses in the fiscal period you pay them.
- Accrual method of accounting is when you report income in the fiscal period you earn it, no matter when you receive it and deduct expenses in the fiscal period you incur them, whether or not you pay them in that period.
- 15 Enter the amounts for your income in the same manner (either cash or accrual) as you reported to the Canada Revenue Agency (CRA).
- Report the total resales and rebates of allowable expenses, including GST/HST rebates, unless you have already reduced your expenses by these amounts.
- 17 Report the total resales and rebates for non-allowable expenses, including GST/HST rebates, unless you have already reduced your expenses by these amounts.
- 18 Report the total sales of commodities that you did not produce in your farming operation. These are commodities that you bought for resale.

- 31 Provide your SCIC contract number and your per cent share of each of the contracts you are involved in.
- 32 If you are involved in a lease agreement, or if you own a portion of an animal, only report your share (e.g., ½ bull).

Lessee: If you lease a breeding herd, but only take a percentage of the calf crop, report only your share of the herd based on your share of the calf crop, using code 8134, Breeding Female, Leased (not owned). For example, if you lease 100 cows but only take 60 per cent of the calf crop, report only 60 cows using code 8134. Report the corresponding number of calves (according to your lease agreement) using the appropriate code for their weight class.

Lessor: If you own cows but lease them out and take a percentage of the calf crop, report 100 per cent of your cows using the applicable codes found in the Inventory Code Lists. Do not use code 8134. Report the corresponding number of calves (your share according to your lease agreement) using the appropriate weight code for their weight class.

Fall and Winter Crop acres/production is be reported in the year of harvest. Input costs associated with these acres/production are recorded in the year the crop was seeded, as an ending purchased input.

Report the crop or forage (including grade) with the expectation to be harvested in this Program Year. Choose the unit of measure that you prefer and state the acres and the quantity produced.

Ending Inventory: Report what is still in inventory at the end of the fiscal period. Commodities and forage grown in other years that are still on hand at the end of this fiscal period should also be included in the Ending Inventory. If you sold grain and deferred the income to another year, remove that sale from Ending Inventory.

Snowed-Under Crops: At the end of your Program Year, if you were unable to harvest some or all of the crop due to snow, those acres are eligible for the Harvest Discount Allowance. Using the commodity code for your crop, report the total acres for the crop and report the estimated/actual production. If the crop was not salvageable, report a quantity of zero. Use code 6826, Harvest Discount Allowance, to indicate the total acreage (regardless of the commodity) that was snowed under and enter "0" as the price per unit.

For example, you seeded 350 acres; 100 acres of canola and 250 acres of barley. You were able to harvest 80 canola acres and 200 barley acres before the remainder was snowed under. Therefore, for your Crop Inventory, you report 100 acres for canola and 250 acres for barley, then enter the actual harvested production you received from those acres (80 and 200). Then report 70 acres as snowed under (50 barley and 20 canola) using code 6826, with 0 price per unit.

Swath Grazing: If you practice swath grazing, report the number of acres you used for swath grazing with the inventory code 5588. If there was swath available for use as feed at the end of your fiscal year, provide your remaining production (in tonnes) as Ending Inventory.

- Acres that were too wet to be seeded, or acres that were seeded but then become too wet to be reseeded by the Crop Insurance seeding deadline, can be reported as Unseedable acres.
- 36 Report the number of cows that calved in the fiscal year.

	Hogs, Farrowing, Up to 50 l	DS		Page		es that have t	oirtnea		

- For Code 105 Feeder Cattle, please do not include calves born in the Program Year as these are automatically included with the cattle productive units. Code 105 Feeder Cattle and Code 106 Finished Cattle may be reported as Feeder Productive units for feeders that were on hand at the start of the year and fed for an appreciable gain of at least 200 lbs, or a minimum of 60 days in the fiscal period. Choose the Productive Capacity that represents the feeder weight at the time of the sale. Feeders that are purchased and retained for over 60 days or 200 lbs of weight gain, should also be included in the Feeder Productive Capacity.
- 38 Report the number of days you custom fed cattle. Animal feed days is calculated as: # of animals × # of days each animal was fed as a custom feed operation (e.g., 100 animals fed for 3 months = 100 × 90 = 9,000 feed days). This code is not used to report having your own cattle custom fed.
- Purchased Inputs are those commodities that were purchased and not used by the end of your fiscal year, with the intent to use it next year. Inputs such as fuel, chemicals, purchased seed, feed, and fall application of fertilizers and chemicals are reported here.
- Deferred income is income you have chosen to postpone the receipt of to a subsequent tax year. A Receivable is income that is owed to you for goods delivered or services provided in one fiscal year, but are not paid to you until a subsequent tax year.
- Include any expenses that were bought and used in the Program Year but were not paid for until a subsequent fiscal year(s). Do not include amounts owed for items purchased through loans, lines of credit or credit cards that have already been reported as an expense with CRA for taxes.
