Livestock Inventory Calculation Worksheet Instruction Guide

How to Complete Your Livestock Inventory Calculation Worksheet

The Livestock Inventory Calculation Worksheet can be used to help report the changes in livestock inventory that have occurred in the farming operation during the fiscal year. The worksheet can be submitted with your AgriStability forms to assist with processing the file.

1 Your SCIC ID and AgriStability PIN are different numbers. The AgriStability PIN is generated by the Federal Government for AgriStability and AgriInvest purposes, whereas the SCIC ID is unique to your Saskatchewan Crop Insurance account.

Note: Crop Insurance contract numbers are not to be used as either the SCIC ID or AgriStability PIN.

2 Enter the applicable commodity code for the inventory you are reporting. Access the current Commodity Code Guide at scic.ca/agristability/publications or call SCIC at 1–866–270–8450 for assistance.

3 Report all livestock by code, listing each class separately. The Commodity Code Guide can be used to assist with choosing the appropriate description.

4 Enter inventory that is on hand at the start of your fiscal year (e.g., if your fiscal year is January 1 to December 31, enter what was in inventory as of December 31 in the prior year).

5 Report the number of calves born in the fiscal year, regardless of deaths using calf code 8007.

6 Report the number of head purchased.

7 Report the number of head sold.

8 Report the number of head that died (including calves).

9 This column may include purchased animals as well as transfers within the herd. Transfers in must equal transfers out.

10 Report transfers out within the heard.

11 Report the number of head on hand at the end of your fiscal year.
