Sod Production

SCIC uses this information to measure the productive capacity of your operation in the program year and then compares it to the productive capacity of your operation in each of the reference years. Where necessary, your reference year margins will be adjusted to account for any structural change in your farming operation.

Provide historical information for each of the years in which you have reported (or should have reported) net farming income or loss to the Canada Revenue Agency.

Report only your share of crop share acres if you are a tenant or a landlord (who is eligible for the AgriStability program). If you have multiple operations, use a separate form to report the production for each operation.

Partnership Percentage	(%)	(%)	(%)	(%)	(%)	(%)
For partnerships, indicate your partnership percentage for this operation in each year.						

Report 100 per cent of the acreage for the partnership below. Your partnership percentage will be applied automatically when your AgriStability benefit is calculated.

Code	Description			
6941	Sod, acres seeded			
6943	Sod, acres growing			
6945	Sod, acres harvested			

For each year, report your acres (owned or rented) based on the sod establishment stage at the end of your fiscal year.

- For code 6941 Sod, acres seeded, enter the total number of acres you have seeded which have not been included under growing or harvested acres that year (e.g., if you seeded 150 acres at the end of and harvested those 150 acres in , enter 150 acres under code 6941 in and enter 150 acres under code 6945 in).
- For code 6943 Sod, acres growing, enter the total number of sod acres in the growing stage that were seeded in the previous years and will be harvested in a subsequent year (e.g., you seeded 150 acres in but did not harvest those 150 acres until , enter 150 acres under code 6941 in , enter 150 acres under code 6943 in 2019 and enter 150 acres under code 6945 in).
- For code 6945 Sod, acres harvested, enter the total number of harvested acres.
