Letters of Transmittal

June 28, 2013

Her Honour, the Honourable Vaughn Solomon Schofield, Lieutenant Governor of Saskatchewan

May it Please Your Honour:

The Saskatchewan Crop Insurance Corporation continues to work together with producers and industry groups to build a stronger agriculture industry in the province. The Corporation remains committed to providing quality service through the business risk management programs it delivers: Crop Insurance, AgriStability and the Wildlife Damage Compensation Program. It will continue to work towards enhancing these programs to support the challenges and changing needs of Saskatchewan's farmers and ranchers.

I have the pleasure of submitting the Saskatchewan Crop Insurance Corporation Annual Report and financial statements for the year ended March 31, 2013.

Respectfully submitted,

Lyle Stewart

Minister of Agriculture

Letters of Transmittal

June 28, 2013

The Honourable Lyle Stewart Minister of Agriculture

Sir:

I wish to present the 2012-2013 Saskatchewan Crop Insurance Corporation Annual Report for the year ended March 31, 2013.

This report outlines the actions undertaken and results achieved in the delivery of the Crop Insurance, AgriStability, and Wildlife Damage Compensation programs, as part of a business risk management suite that helps support Saskatchewan farmers and ranchers.

Respectfully submitted,

Alanna Koch Chair of the Board

Saskatchewan Crop Insurance Corporation

2012-2013 Annual Report

The 2012-2013 Annual Report outlines the Corporation's strategic and financial activities and results for the fiscal year ending March 31, 2013.

The Saskatchewan Crop Insurance Corporation followed the Public Performance Reporting Guidelines when reporting on the results of the 2012-2013 crop year. These guidelines provide an accountability framework for the Corporation's strategic plan and summarize the results achieved against those plans.

The 2012-2013 strategic plan results have been reported against the objectives and performance indicators established in 2011-2012. Complete information can be found on pages 9 through 11.

Management Discussion and Analysis

This Management Discussion and Analysis is intended to provide a detailed look at the Corporation's structure, performance and future goals. It is intended to be read in conjunction with the remainder of the annual report. The Management Discussion and Analysis is organized into the following sections:

Saskatchewan Crop Insurance Corporation

Role within the Saskatchewan Ministry of Agriculture

The Saskatchewan Crop Insurance Corporation (SCIC) is a provincial Treasury Board Crown Corporation under the portfolio of the Minister of Agriculture.

The mandate of the Saskatchewan Ministry of Agriculture is to foster a commercially viable self-sufficient and sustainable agriculture and food sector. The Ministry encourages farmers, ranchers and communities to develop higher value-added production and processing and promotes sustainable economic development in rural Saskatchewan through better risk management.

SCIC has developed strategic themes that correspond to the goals and direction of the Government of Saskatchewan. Where the government aims for economic growth, accountability and support of Saskatchewan families, SCIC will focus on producers, accountability and leadership.

The *Growing Forward* federal-provincial agreement provides the structure and guiding principles for the programs SCIC delivers. Growing Forward features a business risk management suite consisting of four key components:

- Crop Insurance (Agrilnsurance): an existing production insurance program and other insurance products, which may expand to include other commodities;
- AgriStability: a margin-based program that provides income support when a producer experiences larger income losses;
- Agrilnvest: a savings account for producers that provides flexible coverage for small income declines and supports investments to mitigate risks or improve market income; and
- AgriRecovery: a disaster relief framework that allows governments to provide rapid assistance to fill gaps not covered by existing government programs.

Governing Authorities

SCIC is a provincial Crown corporation established by an Act of the Legislature. As joint federal-provincial programs, Crop Insurance and AgriStability are subject to the following acts, regulations and agreements:

• Growing Forward: A Federal-Provincial-Territorial

Framework Agreement on Agriculture, Agri-Food and Agri-Based Products Policy

- Farm Income Protection Act (federal)
- Saskatchewan Crop Insurance Corporation Act (provincial)
- Canada Production Insurance Regulations (federal)
- Crop Insurance Regulations (provincial)
- Federal/Provincial Agrilnsurance Agreement
- Operational document related to the Federal/Provincial Agrilnsurance Agreement
- Income Tax Act (federal)
- Financial Administration Act (federal)
- · AgriStability Program Guidelines (federal)

SCIC also administers payments under the Wildlife Damage Compensation and Livestock Predation Prevention Program – more commonly referred to as the Wildlife Damage Compensation Program – governed under the provincial Farm Financial Stability Act and associated regulations.

SCIC has complied with the provisions of these authorities.

Board of Directors

Under the Saskatchewan Crop Insurance Corporation Act, the Board of Directors is responsible for the overall direction and development of the Crop Insurance and AgriStability programs and is authorized to conduct the affairs of the Corporation. Decisions with major financial and policy implications are developed in consultation with industry and must be approved by the provincial and federal governments.

As of March 31, 2013, the Board members were Alanna Koch, chair and Deputy Minister of the Saskatchewan Ministry of Agriculture, Nithi Govindasamy, vice-chair and Associate Deputy Minister of Agriculture, Glen Clarke and Doug Gattinger. All members are either involved in farm operations or have an agricultural background.

Appeals

The Saskatchewan Crop Insurance Corporation's Provincial Appeal Panel and AgriStability Appeals Committee were established to provide fair and efficient resolution to issues where a dispute between a customer or participant and the Corporation exists regarding the Crop Insurance, Wildlife Damage Compensation or AgriStability Programs. The panel/committee is comprised of producers, appointed by the Board of Directors, to consider and make

recommendations on customer/participant concerns. A voluntary process, informal hearings are held on a regular basis with customers, participants and/or their contact person presenting concerns. SCIC staff also provide information about their decisions and rationale. Following the hearing the panel/committee makes a recommendation to the Board of Directors for a final decision.

Provincial Appeal Panel

As of March 31, 2013, members of the Provincial Appeal Panel were David Weiss (Langenburg), chair; Les Anderson (Parkside), vice-chair; Lee Egland (Eastend); Dwight Thesen (Arborfield); Megan Rumbold (Wadena); and Kevin Elmy (Saltcoats).

The Panel heard 26 appeals between April 1, 2012, and March 31, 2013. Of those appeals, six were approved in whole, 17 were denied and three were partially allowed. One was heard but a decision was not finalized prior to March 31, 2013.

AgriStability Appeals Committee

As of March 31, 2013 the members of the AgriStability Appeals Committee were: Allan Beblow (Yorkton), chair; Neal Hardy (Hudson Bay), chair; Sherri Grant (Val Marie); William Lanfermann (Paradise Hill); Wayne Bacon (Kinistino); Keith Carleton (Neville); Jim Hallick (Sturgis); Dave Kirby (Scout Lake); Tom Hewson (Langbank); Ray Orb (Cupar); Glenn Blakley (Tantallon); and Brent Gessell (Delisle). There must be a minimum of three and a maximum of five appeal panel members at a hearing.

Between April 1, 2012, and March 31, 2013, the Committee heard one appeal for the federally-administered years (up to 2010) of the Program. For years in which SCIC administered AgriStability (beginning in 2010) 11 appeals were heard. Of those appeals five were approved in whole, six were denied and two were postponed to obtain additional information and investigate further.

One of the committee's decisions was overruled by the Board of Directors.

Staff

Saskatchewan Crop Insurance Corporation's head office is located in Melville with 21 customer service offices in communities throughout the province. As of March 31, 2013, SCIC employed 552 individuals, including permanent, temporary and casual positions. Of that number, 256 worked out of head office and 296 worked out of the customer service offices.

2012-2013 Year in Review

The Saskatchewan Crop Insurance Corporation (SCIC) plays a significant role in the delivery of business risk management programs on behalf of the Saskatchewan Ministry of Agriculture.

AgriStability

AgriStability is designed to provide support to producers who experience large income losses.

Since taking over administration of AgriStability in 2010, the SCIC has been working to provide tools and support in an effort to make the program easier to use by both producers and accountants.

One of the items which had been asked for was the ability to complete and submit forms through an online process. In 2012, SCIC introduced AgConnect, a web-based application for reviewing historical program information, as well as completing and submitting forms electronically. Access to this information was not previously available to participants and their accountants. By making such information easily accessible there is greater awareness of how the AgriStability Program works. The response to this platform has been excellent, both from participants, who have taken advantage of the easy-to-use format and from agencies which have been able to expedite the process of submitting program forms on behalf of their clients. As of March 31, 2013, there were 20,335 program participants represented through the activation of the AgConnect accounts. SCIC has also received 9,145 AgriStability applications through AgConnect, which is 46 per cent of all applications submitted.

SCIC has also focused on providing greater access to the resources a participant needs to manage the program. AgriStability Advisors are available through the 21 customer service offices across the province. Their knowledge of Saskatchewan's farming and ranching sector, combined with their comprehensive understanding of the AgriStability Program, makes them a great resource for participants and accountants. They can educate and advise on how to effectively use the AgriStability Program.

SCIC's AgriStability Call Centre has provided exceptional service to Saskatchewan producers. As of March 31, 2013, the Call Centre had received over 26,000 calls from producers and the average time to answer those calls was seven seconds.

As of March 31, 2013, SCIC had completed processing 17,256 applications for the 2011 program year. Of the applications processed, 3,652 have received a benefit payment for a total value of \$174.3 million for 2011 program payments.

Crop Insurance

In February, the Minister of Agriculture announced the 2012 Crop Insurance Program, which included record provincial funding and record coverage levels.

New in 2012, producers had the option to supplement the Unseeded Acreage Benefit of \$70 per eligible acre by purchasing either \$15 or \$30 per acre in additional coverage. In addition, the Unseeded Acreage Benefit calculation was simplified. Crop Insurance also now provides coverage to commercial fruit growers for the establlishment (\$3.50 per tree) and replacement (\$10.00 per tree) of Saskatoon bushes, dwarf sour cherry and haskap fruit trees.

Yield cushioning was extended to include forage crops. This feature limits the impact of consecutive poor growing seasons, such as excess moisture or drought, on a producer's coverage level.

In 2012 establishment benefit values increased from \$20 to \$25 per acre for oats, canary seed, fall rye, spring rye and triticale.

In 2010 and 2011 historic flooding led to the two largest claim years for unseeded acres. Excess moisture was still a significant cause of loss in 2012 as SCIC received 9,863 unseeded acreage claims, its third highest total, providing indemnities worth \$99.3 million. An additional \$12.7 million was provided through the unseeded acreage buy-up option. The 2012 growing season was challenging for many producers across the province. Numerous storms caused hail and wind damage to crops and some areas had higher disease rates and lower yields in their crops due to the climatic conditions. As a result there were 14,081 post-harvest claims. Despite the large number of claims there were many areas of the province where producers experienced average or above average crops.

Approximately 23,467 producers insured 26.7 million acres across the province, which was an increase of 18 per cent compared to the number of insured acres in 2011. Crop Insurance insured 77 per cent of the seeded grain acres in the province and was responsible for a record \$4.6 billion in liability, collecting \$605 million in premiums.

In total, SCIC paid \$398.3 million on 23,756 claims in the multi-peril Crop Insurance Program. The Crop Insurance and federal and provincial reinsurance funds maintain a surplus of \$733.3 million, an increase from 2012 due to premiums exceeding claims.

Wildlife Damage Compensation Program

The Wildlife Damage Compensation Program consists of three components: crop damage compensation, predation compensation and prevention. While SCIC administers this Program, financial reporting is included in the financial statements of the Agricultural Stabilization Fund under the Saskatchewan Ministry of Agriculture.

Compensation paid to producers for big game and waterfowl damage increased in 2012-13 largely due to higher crop prices. There have been approximately 700 more predation claims in 2012-13, providing an additional \$271 thousand in compensation, than in 2011-12. Available prevention measures include predation specialists, lure crops, waterfowl feeding stations, scare cannons and compensation for guard dogs and fencing. Prevention compensation in 2012-13 was similar to 2011-12.

The Wildlife Damage Compensation Program provided approximately \$7.87 million in compensation and prevention measures to producers in 2012, of which \$611 thousand was spent on prevention.

	\$ –	\$ –	\$ -	\$ –	
Program delivery – administration expenses net of other administration revenue					
Crop Insurance	\$ 28,323	\$ 30,070	\$ 30,272	\$ 202	6
AgriStability	\$ 20,676	\$ 25,736	\$ 21,457	\$ (4,279)	
rigitationity	20,070	25,750	→ ∠1, 1 3/		7

Notes:

- The premium and reinsurance premiums were over budget due to actual insured acres of 27.6 million compared to the projected 25.9 million acres that the budget was based on. There was approximately 2 million unseeded acres in 2012 program year.
- 2. Budgeted indemnities were based on a normal claim volume with an indemnity to liability ratio of 9.4 per cent. The actual ratio was 8.98 per cent.
- 3. The budget for other included interest earnings of \$3 million offset by bad debts of \$1 million. The variance is due to interest earnings being \$1.9 million more than the budget and bad debts being \$705,000 less than anticipated.
- 4. The budget for AgriStability indemnities was based on an expected increase in benefits to producers, however, the most recent 2012 benefit forecast is substantially higher than originally forecasted. In addition, there has been a large number of amendments processed in the 2012 year. These factors have contributed to the \$161.3 million variance.
- 5. The actual fees were higher than the budget as more enrolment fees were collected than anticipated.

- 6. Crop Insurance program delivery costs were higher than the budget due to:
 - adjusting and grain grading wages and expenses exceeding the budget by \$3.1 million mostly due to wage adjustments and increased claims;
 - this is partially offset by salaries and benefits being \$2.1 million less, mainly due to vacancy management;
 - revenue from third-party contract work was \$256,000 higher than estimated for budget purposes;
 - computer costs increased by \$94,000 and primarily in consulting fees
 - advertising costs were lower than budget by \$419,000
- 7. The AgriStability Program delivery costs were lower than budget due to :
 - vacancy management being the main contributer to a salaries and benefits variance of \$2.2 million below budget;
 - travel costs were \$240,000 below budget primarily due to less in-province travel;
 - program advertising was \$398,000 less than intended when the budget was established;
 - computer costs were \$1 million less than budgeted due to lower hardware and software purchases; and
 - the share of federal government transistion costs were \$232,000 less than budget.

Saskatchewan Crop Insurance Corporation 2012-2016 Corporate Plan

Summary of Plan

The Saskatchewan Crop Insurance Corporation's Corporate Plan outlines a strategy to achieve success as leaders in developing and providing responsive business risk management programs. The Corporation is guided by three strategic themes: Focus on the producer, Accountability and Leadership. These three themes align with the Saskatchewan Ministry of Agriculture's strategic themes: Enhanced Client Service; Enhanced long-term competitiveness and sustainability of the industry; Improved public perception of agriculture; Enhanced trade advocacy; and A high-performance organization.

Vision Statement

To be leaders in developing and providing innovative and responsive business risk management programs.

Mission Statement

Work in partnership with industry and the Ministry of Agriculture to provide producers with responsive agricultural business risk management programs and services.

Values

We value innovation, open two-way communication, teamwork, accountability, integrity, fairness and respect.

Management's Report

Responsibility for Financial Statements

The financial statements of the Saskatchewan Crop Insurance Corporation are the responsibility of management and are prepared in accordance with Canadian public sector accounting standards applied on the basis consistent with that of the preceding year. Management has applied its best judgment where estimates are required using all information available to June 3, 2013. Other financial information in the annual report is consistent with that provided in these financial statements.

The Saskatchewan Crop Insurance Corporation's accounting system and systems of internal control are maintained to provide reasonable assurance that transactions are properly authorized and recorded, that assets are properly safeguarded and that the financial information is relevant and reliable.

The Saskatchewan Crop Insurance Corporation's external auditor, KPMG LLP, has audited these financial statements and conducted a review of internal accounting policies and procedures to the extent required to enable them to express an opinion on these financial statements.

The Board of Directors of the Saskatchewan Crop Insurance Corporation is responsible for overseeing management's performance of its financial responsibilities and has reviewed and approved these financial statements.

Auditors' Report

To the Members of the Legislative Assembly of the Province of Saskatchewan

We have audited the accompanying financial statements of Saskatchewan Crop Insurance Corporation, which comprise the statement of financial position as at March 31, 2013, and the statements of operations and accumulated surplus, change in net financial assets and cash flows for the year ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian public sector accounting standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involved performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of Saskatchewan Crop Insurance Corporation as at March 31, 2013, and the results of its operations and changes in its net financial assets and its cash flows for the year then ended in accordance with Canadian public sector accounting standards.

Saskatchewan Crop Insurance Corporation **Notes to Financial Statements**

March 31, 2013

The Saskatchewan Crop Insurance Corporation (the "Corporation"), a provincial Treasury Board Crown Corporation, was established under The Crown Corporations Act and continued under The Saskatchewan *Crop Insurance Corporation Act.*

The Corporation administers the federal/provincial Crop Insurance (Agrilnsurance) and AgriStability Programs. In addition, on behalf of the Ministry of Agriculture and the Saskatchewan Agricultural Stabilization Fund, the Corporation administers the Wildlife Damage Compensation and Canada Saskatchewan Assistance accounts. The financial results of the Saskatchewan Agricultural Stabilization Fund are reported separately.

Growing Forward: A Federal-Provincial-Territorial Framework Agreement on Agriculture, Agri-Food and Agri-Based Products Policy, which replaced the Canada Saskatchewan Agriculture Policy Framework Implementation Agreement, requires that reinsurance funds be established by the Government of Canada and the Government of Saskatchewan. These reinsurance funds receive reinsurance premiums from the Corporation and, under certain circumstances, pay reinsurance benefits to the Corporation.

Crop Insurance rates and reinsurance premiums are set such that the Crop Insurance Program is actuarially sound over the long-term. Any indemnities receivable, in excess of assets of the Crop Reinsurance Fund of Saskatchewan, will be recovered through future reinsurance premiums paid by the Corporation. If these future reinsurance premiums are insufficient to pay reinsurance benefits and repay this receivable, the Province of Saskatchewan General Revenue Fund is required to fund any deficiency.

The Crop Reinsurance Fund of Saskatchewan is administered by the Corporation. The operations, assets and liabilities of this reinsurance fund are reported in separate financial statements as required by the Growing Forward: A Federal-Provincial-Territorial Framework Agreement on Agriculture, Agri-Food and Agri-Based Products Policy.

AgriStability was established under the Growing Forward: A Federal-Provincial-Territorial Framework Agreement on Agriculture, Agri-Food and Agri-Based Products Policy as a continuation of the Canadian Agricultural Income Stabilization (CAIS) program. The Corporation began administering this program for Saskatchewan as of January 1, 2010. This program provides agricultural producers with protection against declines in Production Margin (as defined in the AgriStability Program

Guidelines). Participants must enrol in the program and pay administration and enrolment fees based on a reference margin based on the individual participant's Production Margin for specified prior years. A program benefit is paid to the participant when the participant's current Production Margin falls below the set reference margin. AgriStability provides coverage for Production Margin declines greater than 15 per cent. The Federal and Saskatchewan governments share the Agristability program costs on the basis of 60 per cent and 40 per cent respectively.

As a crown entity, the Corporation is not subject to federal or provincial income tax, or federal goods and services tax.

1. Significant Accounting Policies:

The financial statements of Saskatchewan Crop Insurance Corporation (the "Corporation") have been prepared by management in accordance with Canadian generally accepted accounting principles for governments as recommended by the Public Sector Accounting Board ("PSAB") of the Canadian Institute of Chartered Accountants. The Corporation adopted Canadian Public Sector Standards: PS1201 Financial Statement Presentation; PS2601 Foreign Currency Translation; and, PS3450 Financial Instruments during the year. The adoption of these standards had no significant impact on the Corporation's financial results. Significant accounting policies adopted by the Corporation are as follows:

(a) Basis of accounting:

The Corporation follows the accrual method of accounting for revenues and expenses. Revenues are normally recognized in the year in which they are earned and measurable. Expenses are recognized as they are incurred and measurable as a result of receipt of goods or services and/or the creation of a legal obligation to pay.

(b) Government transfers:

Government transfers are without stipulations restricting their use and are recognized in the financial statements as revenues in the period in which the transfers are authorized, any eligibility criteria met, and reasonable estimates of the amounts can be made.

(c) Financial assets and liabilities:

Financial assets and liabilities of the Corporation include cash, investments, due from the Province of Saskatchewan General Revenue Fund, accrued interest and other receivables, due from producers, due from the Province of Saskatchewan, due from the Government

of Canada, accounts payable and accrued liabilities, deferred indemnities payable, indemnities payable and reinsurance premium payable to Crop Reinsurance Fund of Saskatchewan.

Cash and investments are recorded by the Corporation at fair value. All other financial assets and liabilities are recorded at amortized cost.

(d) Investments:

Investments consist of bankers' acceptances and corporate promissory notes and are recorded at fair value. The fair value of investments is based on cost, which approximates fair value due to the immediate or short-term nature of these financial instruments.

(e) Investment earnings:

The Corporation recognizes interest as earned and investment gains and losses when realized.

Realized gains and losses represent the difference between the amounts received through the sale of investments and their respective cost base. Interest is generally receivable on a semi-annual basis.

(f) Non-financial assets:

Non financial assets are not available to discharge existing liabilities and are held for use in the provision of services. They have useful lives extending beyond the current year and are not intended for sale in the ordinary course of operations.

(g) Tangible capital assets:

Tangible capital assets are recorded at cost which includes amounts that are directly attributable to acquisition, construction, development or betterment of the asset. The cost, less residual value of the assets, excluding land, is amortized on a straight line basis over their estimated useful lives as follows:

Asset	Useful Life - Years
Equipment	5
Leasehold improvements	5
Computer equipment	5
Software	5

(h) Indemnities payable:

Indemnities payable represents estimates of the total cost of outstanding claims at the year-end date. Measurement of the indemnities payable is uncertain as all of the necessary information for reported claims is not always available as of the year-end and therefore estimates are made as to the value of these claims. As a result, indemnities payable are selected from a range of possible outcomes and actual results may differ materially from those estimates.

(i) Premium revenue recognition:

Crop Insurance is a cost-shared program. Premium payments are cost-shared for 2013 and 2012 as follows:

	Producers %	Federal Gov't %	Provincial Gov't %
Comprehensive			
coverage	40.0	36.0	24.0
Weather derivatives Weather derivatives	40.0	36.0	24.0
top-op	40.0	20.0	40.0

Premiums, including the producer and federal and provincial governments' contributions, are recognized as revenue when invoiced to producers.

(j) Use of estimates:

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the period. Significant estimates include the determination of indemnities payable, the corresponding contributions and receivables from the Province of Saskatchewan and Government of Canada and the allowance for doubtful premiums receivable. Actual results could differ materially from these estimates.

(k) Budget figures:

The budget results and budget amounts have been derived from the budget approved by the Board on April 24, 2012.

2. Due from the Province of Saskatchewan General Revenue Fund:

The Corporation's bank account is included in the Consolidated Offset Bank Concentration arrangement for the Government of the Province of Saskatchewan. Interest is earned on these funds at the government's thirty-day borrowing rate, and is based on the Corporation's average daily account balance. Interest is paid by the Province of Saskatchewan General Revenue Fund to the Corporation on a quarterly basis. During the current year, the average rate was 1.09 per cent (2012 – 1.05 per cent).

3. Investments:

The Corporation's investments are in bankers' acceptances and corporate promissory notes maturing within five days of March 31, 2013 with an average effective interest rate of 1.12 per cent (2012 – within 13 days of March 31, 2012 and 1.12 per cent, respectively).

4. Determination of fair value:

Fair value is best evidenced by an independent quoted market price for the same instrument in an active market. An active market is one where quoted prices are readily available, representing regularly occurring transactions. The determination of fair value requires judgment and is based on market information where available and appropriate. Fair value measurements are categorized into levels within a fair value hierarchy based on the nature of the inputs used in the valuation.

Level 1 – Where quoted prices are readily available from an active market.

Level 2 – Valuation model not using quoted prices, but still using predominantly observable market inputs such as market interest rates.

Level 3 – Models using inputs that are not based on observable market data.

The Corporation's investments are all measured at fair value using predominantly observable market inputs such as market interest rates, which is considered level 2. During the year no investments were transferred between levels.

5. Tangible capital assets:

5. Tangible capital assets:	Ec	juipment	 easehold rovements		Computer Software	computer quipment	Total
2013				(thou	usands of \$)		
Cost Balance, beginning of year Additions Disposals	\$	4,703 59 (2,578)	\$ 8,863 232	\$	12,422 867 (2,857)	\$ 15,666 108 (7,944)	\$ 41,654 1,266 (13,379)

2012							
Cost Balance, beginning of year Additions	\$	3,666 1,037	\$ 5,110 3,753	\$	12,105 317	\$ 14,837 829	\$ 35,718 5,936
Balance, end of year	\$	4,703	\$ 8,863	\$	12,422	\$ 15,666	\$ 41,654
Accumulated Amortization Balance, beginning of year Amortization expense	\$	3,057 282	\$ 1,836 1,187	\$	5,662 1,737	\$ 11,975 943	\$ 22,530 4,149
Balance, end of year	\$	3,339	\$ 3,023	\$	7,399	\$ 12,918	\$ 26,679
Net book value, end of year	\$	1,364	\$ 5,840	\$	5,023	\$ 2,748	\$ 14,975

The write-down of tangible capital assets during the year was \$nil (2012 \$nil).

6. Indemnities Payable:

The following is a reconciliation of the AgriStability and Crop Insurance indemnities payable:

		2013		2012
	(thousands of \$)			
AgriStability				
Balance, beginning of the year	\$	128,032	\$	257,724
Provision for current year claims		197,500		101,500
Benefits paid during the current year Prior years' claim cost		(245,100)		(233,733)
experience higher than expected		166,828		2,541
Balance, end of year	\$	247,260	\$	128,032
Crop Insurance (Agrilnsurance)				
Balance, beginning of year	\$	1,779	\$	6,513
Provision for current year claims		404,286		472,127
Benefits paid during the current year Prior years' claim cost experience		(402,447)		(477,754)
higher (lower) than expected		(390)		893
Balance, end of year	\$	3,228	\$	1,779
Total indemnities payable	\$	250,488	\$	129,811

AgriStability indemnities payable have been estimated using economic models which consider the number of program participants, estimated reference margins, estimated claim year margins based on projected forecast commodity prices, crop yields, inventory changes and forecast changes in eligible income and expenses on an aggregate basis for different sectors of the agricultural industry. These models are updated as more current information becomes known for individual crop years.

Due to poor weather conditions, many prior year Crop Insurance claims could not be finalized by March 31, 2013. Crop Insurance indemnities payable have been estimated based on the number of claims outstanding at year end.

The entire indemnities payable balance is subject to measurement uncertainty as the assumptions used to estimate AgriStability and Crop Insurance indemnities payable may change over time. It is possible that such changes could cause a material change to these payables and the corresponding contributions and receivables from the Province of Saskatchewan and the Government of Canada.

7. Financial Risk Management:

The nature of the Corporation's operations results in a statement of financial position that consists primarily of financial instruments. The risks that arise are credit risk, market risk (consisting of interest rate risk, foreign exchange risk and equity price risk) and liquidity risk.

Significant financial risks are related to the Corporation's investments. These financial risks are managed by investing in short-term investments which reduce the risk of market fluctuations.

Credit risk:

The Corporation's credit risk arises primarily from two distinct sources: accounts receivable (from its customers and reinsurers) and certain investments. The maximum credit risk to which it is exposed at March 31, 2013 is limited to the carrying value of the financial assets summarized as follows:

	2013		2012
	(thousa	nds of S	\$)
Cash	\$ 252	\$	145
Investments	11,895		11,496
Accrued interest and other			
receivables	2,925		2,108
Due from producers	13,809		13,191
Due from the Province of			
Saskatchewan	99,423		55,722
Due from the Government of			
Canada	156,527		81,358
Total	\$ 284,831	\$	164,020

The breakdown of due from producers is as follows:

	2013			2012
		(thousan	ds of \$)	
Less than one year	\$	10,232	\$	13,789
Greater than one year		11,152		6,887
Subtotal		21,384		20,676
Allowance for doubtful				
accounts		(7,575)		(7,485)
Total	\$	13,809	\$	13,191

Provisions for credit losses are maintained in an allowance account and regularly reviewed by the Corporation.

Amounts are written off once reasonable collection efforts have been exhausted. Details of the allowance account are as follows:

	2013	2012
	(thous	ands of \$)
Allowance for doubtful accounts, opening balance	\$ 7,485	\$ 6,789
Accounts written off	(205)	(171)
Current period provision	295	867
Allowance for doubtful accounts, ending balance	\$ 7,575	\$ 7,485

Market risk:

Market risk represents the potential for loss from changes in the value of financial instruments. Value can be affected by changes in interest rates, foreign exchange rates and equity prices. Market risk primarily impacts the value of investments.

Interest rate risk is managed by investing primarily in short term investments. The Corporation is not subject to risks related to foreign exchange or equity prices.

Liquidity risk:

Liquidity risk is the risk that the Corporation is unable to meet its financial obligations as they become due. Cash resources are managed on a daily basis based on anticipated cash flows. The majority of financial liabilities, excluding certain unpaid claims liabilities, are short-term in nature, due within one year. The Corporation generally maintains positive overall cash flows through cash generated from operations, as well as cash generated from its investing activities.

8. Pension plans:

The Corporation's employees participate in the Public Service Superannuation Plan, a multi-employer defined benefit pension plan, or the Public Employees Pension Plan, a multi employer defined contribution pension plan. Pension costs of \$1,747,000 (2012--\$1,682,000) are included in salaries and benefits and comprise the cost of employer contributions for current service of employees during the year.

The Corporation's liability is limited to the required contributions.

9. Related party transactions:

Included in these financial statements are transactions with various Saskatchewan crown corporations, ministries and agencies related to the Corporation by virtue of common control exercised by the Government of the Province of Saskatchewan.

Routine operating transactions with related parties are measured at agreed upon exchange rates under normal trade terms. These financial statements include the following balances from and transactions with related parties:

		2013		2012
		of \$)		
Accounts payable	\$	331	\$	700
Administration expenses		11,418		13,520
Administration revenue		768		1,041

Other related party transactions are disclosed elsewhere in these financial statements.

10. Contractual obligations and contingencies:

Contractual obligations:

The Corporation is committed to the Ministry of Government Services, a related crown entity, for several leases for office space with annual payments of \$3,398,000. The leases are currently renewable on an annual basis.

The Corporation is also committed to other corporations for the purchase of weather data and the lease of equipment for weather stations around Saskatchewan. Minimum payments are \$448,000 for 2013-2014.

The Corporation is committed to purchasing software services in the amount of \$478,000 in the next year. In addition, the Corporation has committed to spend \$600,000 to complete the process of upgrading its customer service system in the next year.

Contingencies:

Pursuant to the *Growing Forward: A Federal-Provincial-Territorial Framework Agreement on Agriculture, Agri-Food and Agri-Based Products Policy*, in the event the agreement is terminated and no new agreement is entered into, all tangible capital assets funded by the agreement shall be disposed of and the proceeds shall be shared by the Government of the Province of Saskatchewan and the Government of Canada. As of March 31, 2013, all tangible capital assets owned by the Corporation had been funded by this agreement.

Various legal actions for additional crop insurance indemnity payments have been initiated against the Corporation. Presently, the Corporation is actively defending these cases. While the outcome of these claims cannot be determined, management is of the opinion that the result of these actions will not have a material impact on the Corporation's financial position.

Crop Reinsurance Fund of Saskatchewan Auditors Report

To the Members of the Legislative Assembly of the Province of Saskatchewan

We have audited the accompanying financial statements of Crop Reinsurance Fund of Saskatchewan, which comprise the statement of financial position as at March 31, 2013, and the statement of operations and changes in accumulated surplus for the year then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian public sector accounting standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements,

whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Crop Reinsurance Fund of Saskatchewan as at March 31, 2013, and the results of its operations and cash flows for the year then ended in accordance with Canadian public sector accounting standards.

Accumulated Surplus, beginning of year	84,188	58,902
Accumulated Surplus, end of year	\$ 123,457	\$ 84,188

See accompanying notes to financial statements.

Notes to Financial Statements of the Crop Reinsurance Fund of Saskatchewan

March 31, 2013

Growing Forward: A Federal-Provincial-Territorial Framework Agreement on Agriculture, Agri-Food and Agri-Based Products Policy replaced the Canada-Saskatchewan Agriculture Policy Framework Implementation Agreement and provides for the establishment of two reinsurance funds:

- a) The Crop Reinsurance Fund of Saskatchewan (the Fund) which is administered by the Government of the Province of Saskatchewan, and
- b) The Crop Reinsurance Fund of Canada for Saskatchewan which is administered by the Government of Canada.

1. Significant accounting policies:

The financial statements of the Crop Reinsurance Fund of Saskatchewan have been prepared by management in accordance with Canadian generally accepted accounting principles for governments as recommended by the Public Sector Accounting Board ("PSAB") of the Canadian Institute of Chartered Accountants. The Fund adopted Canadian public sector accounting standards PS1201 Financial Statements Presentation, PS2601 Foreign Currency Translation and PS3450 Financial Instruments during the year. The adoption of these standards had no significant impact on the Fund's financial results.

Reinsurance premium ceded from the Saskatchewan Crop Insurance Corporation:

Under the terms of the agreement referred to above, the Saskatchewan Crop Insurance Corporation is required to pay reinsurance premiums to the reinsurance funds based on premiums received during the insurance year.

Liability for claim payments from the reinsurance funds:

Under the terms of the agreement referred to above, payments are required from the reinsurance funds if indemnities which were required to be paid in an insurance year exceeded the aggregate of:

- a) the premium receipts for the year less reinsurance premiums ceded, and
- b) the net assets of the Saskatchewan Crop Insurance Corporation's Crop Insurance Fund.

To the extent that payments are required out of the reinsurance funds, the Crop Reinsurance Fund of Saskatchewan is responsible for an amount not exceeding 2.50 per cent (2012-2.50 per cent) of the total liability under policies in force in the insurance year. However, the

Crop Reinsurance Fund of Saskatchewan is not required to pay this amount if it has made a payment in previous years and the payment that has not yet been recovered from its operations exceeds 16.67 per cent of the total liability of the policies in force for the current year.

The balance of indemnities that exceed the net assets in the Saskatchewan Crop Insurance Corporation are shared 75 per cent by the Reinsurance Fund of Canada for Saskatchewan and 25 per cent by the Reinsurance Fund of Saskatchewan.

Crop insurance rates and reinsurance premiums are set such that the Crop Insurance Program is actuarially sound over the long term. Any indemnities payable to the Saskatchewan Crop Insurance Corporation, in excess of assets within the Crop Reinsurance Fund of Saskatchewan, will be recovered through future reinsurance premiums paid by the Saskatchewan Crop Insurance Corporation. If these future reinsurance premiums are insufficient to allow the Crop Reinsurance Fund of Saskatchewan to repay this payable, the Government of Saskatchewan is required to fund any deficiency.

Indemnities payable to Saskatchewan Crop Insurance Corporation:

This includes estimates of the total cost of outstanding claims at the year-end date. Measurement of the indemnities payable is uncertain as all of the necessary information for reported claims is not always available as of the year-end and therefore estimates are made as to the value of these claims.

As a result, indemnities payable are selected from a range of possible outcomes and actual results may differ materially from the estimate.

Use of estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions which affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the period. Actual results could differ materially from those estimated.

2. Due from Province of Saskatchewan General Revenue Fund:

The Crop Reinsurance Fund bank account is included in the Consolidated Offset Bank Concentration arrangement for the Government of the Province of Saskatchewan.

Interest earned on these funds is not allocated to the Crop Reinsurance Fund.

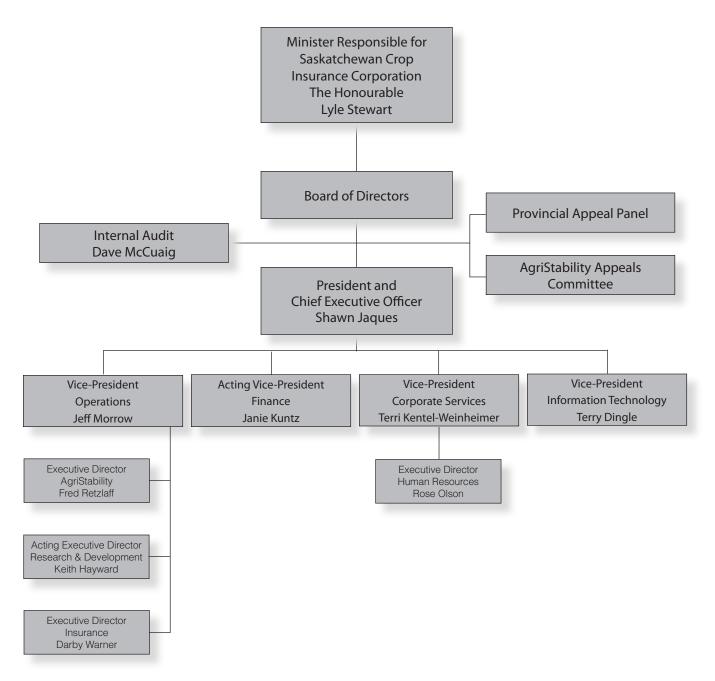

3. Statement of cash flows:

A statement of cash flows has not been prepared as a separate statement would not provide additional, useful information.

4. Fair value of financial assets:

The fair value of the due from Province of Saskatchewan General Revenue Fund and the reinsurance premium receivable from Saskatchewan Crop Insurance Corporation approximate their carrying values due to their short-term nature.

^{*}Not all registered claims result in an inspection and/or payable loss.

Crop Insurance Overview

The Crop Insurance Program assists farmers and ranchers in managing their operation's production risk against natural hazards over the crop year. The multi-peril Crop Insurance Program guarantees customers a minimum crop yield and quality, while additional program options allow producers to tailor coverage to their operation. The following is a summary of the Crop Insurance program that was available to producers from April 1, 2012, to March 31, 2013.

Establishment Benefit

The Establishment Benefit is a component of the core multi-peril contract of insurance. It covers crops that fail to adequately establish or suffer significant damage due to insurable causes before June 20.

Establishn	nent Benefit	
Crop Year	# of Claims Paid	Indemnity Paid
2003	3,408	\$ 9,792,735
2004	4,540	8,498,000
2005	2,181	3,167,670
2006	1,976	3,833,040
2007	1,303	3,148,210
2008	841	3,055,125
2009	1,227	9,559,530
2010	4,517	13,907,805
2011	2,245	11,024,645
2012	2,172	9,079,660
* This is for the gra	ains program only.	

Gopher Damage Feature

During the establishment period, customers have two options for acres damaged by gophers: an Establishment Benefit or the Gopher Damage Feature. This feature provides \$50 per acre for crop acres destroyed by gophers until June 20.

Gopher Damage Feature						
Crop Year # of Claims Paid Indemnity Paid						
2007	425	\$ 1,005,350				
2008	358	687,600				
2009	126	209,450				
2010	114	159,350				
2011	37	38,150				
2012	41	30,400				

Unseeded Acreage

The Unseeded Acreage feature compensates producers for acres that are too wet to seed by June 20. The calculation to determine eligible acres includes seeding intensities and a deductible. The seeding intensity is a four-year average comparing seeded acres to cultivated acres to determine the acres normally seeded. A five per cent deductible of the acres normally seeded is also applied.

Unseeded	Acreage	
Crop Year	# of Claims Paid	Indemnity Paid
2003	95	\$ 436,500
2004	2,967	31,579,950
2005	2,327	15,242,850
2006	5,920	62,581,750
2007	6,241	33,677,350
2008	39	33,600
2009	230	458,713
2010	12,049	222,155,750
2011	13,479	332,004,610
2012	9,863	99,393,643

Unseeded Acreage Buy-up Option

The unseeded acreage buy-up option was introduced in 2012, allowing producers the option to buy additional unseeded acreage coverage for \$15 or \$30 per eligible acre. The additional payment is made on the same acres eligible for the unseeded acreage benefit.

Unseeded Acreage Buy-up Option						
Crop Year	# of Claims Paid Indemnity Paid					
2012	1,731*	\$ 12,774,045				
* These claims were also paid under the 2012 Unseeded Acreage benefit.						

Irrigation Coverage

Coverage is higher and premium rates are lower for irrigated crops than for dryland crops, reflecting the higher average yields and reduced risk.

The Enhanced Irrigation Pilot Program was introduced in 2008 to provide a separate guarantee for irrigated and dryland acres of the same crop; indemnities on one land use will not affect production of the same crop on the other land use.

Irrigation Option Historical Participation						
Year	Insured Acres	Year	Insured Acres			
2003	37,793	2008	37,606			
2004	40,734	2009	37,653			
2005	47,492	2010	39,839			
2006	36,583	2011	45,983			
2007	35,355	2012	46,228			
		•				

Diversification Option

The Diversification Option is available for crops and varieties not insurable under the core multi-peril insurance program. A producer must have acres enrolled in the regular grains program as coverage, premium and claims are averaged.

Diversification Option Historical Participation						
Year	Insured Acres	Year	Insured Acres			
2003	7,473	2008	9,263			
2004	8,906	2009	12,106			
2005	8,500	2010	4,862			
2006	13,200	2011	6,623			
2007	9,612	2012	17,890			
		1				

Pedigreed Seed Option

The Pedigreed Seed Option provides a higher price option for insurable crops and a quality adjustment if the germination for the seed produced is below certified seed standards.

Pedigreed Crop Option Historical Participation						
Year	Insured Acres	Year	Insured Acres			
2003	170,216	2008	137,286			
2004	157,720	2009	154,615			
2005	155,988	2010	124,635			
2006	131,147	2011	116,469			
2007	118,485	2012	132,577			

Organic Option

Organic coverage for production losses is available for certified organic producers. Organic prices are set higher than commercial crops based on markets; yields are reduced and premium rates are higher to reflect increased risk.

Organic Crop Option Historical Participation						
Year	Insured Acres	Year	Insured Acres			
2003	172,032	2008	219,522			
2004	167,247	2009	220,249			
2005	204,679	2010	142,662			
2006	179,641	2011	160,068			
2007	185,941	2012	210,155			
		,				

Vegetable Insurance Program

Vegetable insurance is an acreage loss insurance program; individual production is not measured.

Vegetable Insurance Program											
Year	Contracts	Endorsements	Acres		Liability	Claims	P	remium	Indem	nity	Loss Ratio

Crop Averaging Program

The Crop Averaging Program groups insured crops and provides coverage up to 90 per cent, for the same premium as 80 per cent. Claims are paid based on the total value of crops harvested compared to the dollar coverage on all crops.

Crop	Averaging	Program						
Year	Contracts	Endorsements	Acres	Liability	Claims	Premium	Indemnity	Loss Ratio
2005	19	62	48,446	\$ 4,931,459	1	\$ 558,445	\$ 33,083	0.06

Honey Production Insurance Program

The Honey Production Insurance Program insured honey for yield loss for commercial beekeepers in the province. Beekeepers were offered individual coverage based on 10 years of verifiable production information and could select coverage at 50, 60 or 70 per cent of their average yield.

Hone	Honey Production Insurance Program										
Year	Contracts	Endorsements	Hives		Liability	Claims	F	Premium		Indemnity	Loss Ratio
2010	7	7	4,943	\$	1,131,557	2	\$	71,501	\$	20,620	0.29

2012	4	4	1,278		259,424	1	\$	18,415		8,133	0.44

Fruit Tree Program

The Fruit Tree Program provides coverage for the loss of fruit trees due to natural perils. Insurance coverage is based on the insured value of \$3.50 per tree for establishment (one to three years) and \$10.00 per tree for replacement (four to six years) with a 10 per cent deductible.

Fruit Tree Program											
Year 2012	Contracts 2	Endorsements 2	Trees 1,537	\$	Liability 7,983	Claims -	Pre \$	emium 485	Indemnity \$	Loss Rat	

Wild Rice Insurance Program

This program is an area-based insurance program; coverage is based on the region in which a producer harvests. Claims are triggered when a region's reported annual production is less than the average historical production.

Forage Insurance Program

This program provides production loss insurance on tame hay, greenfeed, dehydrated alfalfa and sweetclover. The Saskatchewan Crop Insurance Corporation also offers a Timothy Hay Pilot Program to producers in the Outlook area, providing coverage on irrigated acres intended for export.

Weather-Derivative Programs

The Saskatchewan Crop Insurance Corporation has two weather-derivative programs where claims are not based on individual production but on data gathered at selected weather stations. The Forage Rainfall Insurance Program protects grazing acres against below-average seasonal precipitation. The Corn Heat Unit Program insures feed and grain corn producers against a lack of required heat units over the growing season.

Forage Rainfall Insurance Program

^{*} In 1992 only, the provincial government paid 41% per cent producers, 33% per cent, and the federal government 25 per cent of the incremental premium between 70 and 80 per cent coverage.

 $[\]Diamond$ For 2000 only, the federal government paid 60 per cent of government premiums.

[§] Projected Overall cost sharing. Also applied to Forage Rainfall Insurance Program (FRIP) and Annual Crop Weather Based Insurance Program (ACWBP).

Δ The cost sharing for high cost coverage is established under the Growing Forward Agreement. It applied to the Enhanced Top-Up Option under the Annual Crop Weather Based Insurance Program as the coverage was considered to be above the level provided under the comprehensive cost-sharing provisions of the Agricultural Policy Framework.

[~] The Enhanced Irrigation Pilot is High Cost Coverage; however, the provincial government contributes the additional premium reducing the customer premium share to 40 per cent.

Appendix 4: Wildlife Damage Compensation Program

Saskatchewan Crop Insurance Corporation administers the Wildlife Damage Compensation Program under the *Growing Forward* agreement on behalf of the federal and provincial governments. Financial reporting for the program is included in the financial statements of the Agricultural Stabilization Fund under the Saskatchewan Ministry of Agriculture.

Funding for crop and predation losses is cost shared 60 per cent by the federal government and 40 per cent by the provincial government for 80 per cent of the compensation. The remaining 20 per cent has been provided through an increased investment from the Government of Saskatchewan.

Predation Damage								
Fiscal Year	Predation Claims	Preda	tion Comp. Paid					
10–11	3,553	\$	1,489,132					
11–12	2,205		1,268,279					
12–13	2,957		1,539,069					

As part of the Saskatchewan Crop Insurance Corporation's administration of the Wildlife Damage Compensation Program support is provided for preventative measures to help protect livestock, crops or feed from damage caused by wildlife.

Big Game

From 1984 to 1990, the Big Game Compensation Program was administered by Saskatchewan Environment followed by the Saskatchewan Crop Insurance Corporation, starting in 1991. No program was offered in 1994 and 1995. The Big Game program resumed in November of 1996, but claims were not paid until 1997. Therefore, 97–98 included claims from both 1996 and 1997 crop years.

Prior to 1996, the Big Game program was a provincial responsibility while the waterfowl program was a joint responsibility, with the indemnities shared between governments on a 50/50 basis. Payments under both programs were funded pay-as-you-go. Beginning in 1996, both programs were made eligible for federal and provincial funding.

^{*100} per cent compensation began in 2009/10.
